

Number of Respondents: 260.

Frequency of Response: Annual and on occasion reporting requirements, third party disclosure requirement.

Total Annual Burden: 155 hours.

Total Annual Cost: N/A.

Needs and Uses: In the Universal Service Order, the Commission determined that rural and non-rural carriers will receive federal universal service support determined separate mechanisms. The Commission determined that local exchange carriers (LECs) should self-certify their status as a rural company each year to the Commission and their state commission. Carriers who serve fewer than 100,000 access lines do not have to file the annual rural certification letter unless their status has changed since their last filing. For carriers with more than 100,000 access lines, that seek rural status, must file rural self-certifications and such carriers also are required to file only in the event of a change in their status. States must submit a list of carriers designed as eligible telecommunications carriers and the service areas such as non-rural carriers are required to serve to the Universal Service Administrator and the Commission. If a LECs status as a rural telephone company changes to that it becomes ineligible for certification as a rural carrier, that carrier must inform the Commission and the Universal Service Administrator within one month of the change in status. All of the requirements are necessary to implement the congressional mandate for universal service. The reporting requirements are necessary to verify that particular carriers and other respondents are eligible to receive universal service support.
