Title of Proposal: Telephone survey of sponsor/managers of HUD-assisted properties housing people with disabilities regarding property size and type, resident characteristics, and program operations.

OMB Control Number:

Description of the need for the information and proposed use: The information to be collected is part of a larger study, mandated by Congress and conducted by Abt Associates Inc., of the social and economic benefits and problems of providing housing for people with disabilities in projects of

varying sizes. Specifically, the study will look at HUD's Section 811 and Section 202 programs and will explore how project size influences the properties, their residents, and the immediate neighborhoods. The telephone survey of sponsor/managers will administered to a nationally representative sample of Section 811 and 202 property sponsor/managers. The topics will include project and resident characteristics, services offered on site, off-site services available to

residents, other links between the project and the surrounding neighborhood, factors that contribute to development and operating costs, and opinions on how project scale relates to costs, access to services, acceptance by the community, and residents' quality of life. This information is not currently available from any other source. The data will be compiled in a database for analysis for the study's final report. This research is intended to help HUD respond to Congress' interest in project

scale and, more broadly, to explore effective project-based housing solutions for low-income people with disabilities.

Members of affected public: Sponsor/managers of Section 811 and Section 202 properties.

Estimation of the total number of hours needed to prepare the information collection, including the number of respondents, frequency of response, and hours of response:
