

Establishing the linkage between sources, environmental concentrations, exposure, adverse effects or disease, and effectiveness so that a change in a human health outcomes subsequent to a risk management action can be determined by measuring or modeling any one of these linked steps; and (ii) improving methods and models by which others can measure or model changes in public health outcomes following various risk management actions.

Charge: The current Charge that the Agency is asking the SAB to implement in this review follows. The final Charge may change some as a result of ongoing discussions between the Agency and the Panel. Updates will be posted on the SAB Web site: www.epa.gov/sab.

ORD is requesting a review by the SAB of the Human Health Research Strategy, including the following points:

a. Does the document establish the appropriate direction and research areas (*i.e.*, aggregate-cumulative risk, harmonization, susceptible subpopulations, effectiveness of public health outcomes) for a long-term, core research program on human health risk assessment?

b. Will the research that is described reduce uncertainty in the risk assessment process?

c. For the research areas selected, does the strategy provide a clear framework for a multi-disciplinary research program?

d. Does the strategy provide a logical approach for framing research to evaluate the impact of risk management decisions on human health?

Review Document Availability—The EPA research strategy for human health is documented in the Human Health Research Strategy, U.S. EPA Office of Research and Development, Internal Review Draft, May 2002. Those members of the public who wish to view the Agency draft document as they consider who might be appropriate to nominate for this panel should obtain or read it on the EPA ORD NHEERL Web site at www.epa.gov/nheerl/humanhealth.
