Agency (EPA).**ACTION:** Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Santa Barbara County Air Pollution Control District (SBCAPCD) and El Dorado County Air Pollution Control District (EDCAPCD) portion of the California State Implementation Plan (SIP). These revisions concern volatile organic compound (VOC) emissions from crude oil separation and storage operations, liquid reactive organic compound storage, and organic liquid loading and transport. We are proposing to approve local rules to regulate these emission sources under the Clean Air Act as amended in 1990 (CAA or the Act).

SUPPLEMENTARY INFORMATION: This
proposal addresses the following local

Compound Liquids, and EDCAPCD Rule
244—Organic Liquid Loading and
Transport Vessels. In the Rules and
Regulations section of this **Federal
Register**, we are approving these local
rules in a direct final action without
prior proposal because we believe these
SIP revisions are not controversial. If we
receive adverse comments, however, we
will publish a timely withdrawal of the
direct final rule and address the
comments in subsequent action based
on this proposed rule. Please note that
if we receive adverse comment on an
amendment, paragraph, or section of
this rule and if that provision may be
severed from the remainder of the rule,
we may adopt as final those provisions
of the rule that are not the subject of an
adverse comment.

We do not plan to open a second
comment period, so anyone interested
in commenting should do so at this
time. If we do not receive adverse
comments, no further activity is
planned. For further information, please
see the direct final action.
