

the "normal course of trade."

Consequently, as in the most recently completed segment of this proceeding, we have denied CBCC's reported credit expense and have used the SELIC rate to calculate the expense. *See Silicon Metal 1999-2000*, 67 FR 6488 (February 12, 2002) and accompanying Decision Memorandum at Comment 18.

In order to adjust for differences in packing between the two markets, we deducted HM packing costs and added U.S. packing costs, where appropriate, in accordance with sections 773(a)(6)(A) and (B) of the Act.

#### Currency Conversions

We made currency conversions in accordance with section 773A of the Act based on the exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

#### Preliminary Results of Review

As a result of our review, we preliminarily determine that the following weighted-average dumping margins exist for the period July 1, 2000 through June 30, 2001, and we preliminarily determine not to revoke the order covering silicon metal from Brazil with respect to sales of subject merchandise by Minasligas. However, we do preliminarily determine to revoke the order covering silicon metal from Brazil with respect to sales of subject merchandise by Rima.

Manufacturer/exporter	Weighted-average Margin Percentage
CBCC .....	0.00
Minasligas .....	4.30
Rima .....	0.00

Pursuant to 19 CFR 351.224(b), the Department will disclose to parties to the proceeding any calculations performed in connection with these preliminary results within 5 days of the date of publication of this notice. Any interested party may request a hearing within 30 days of the date of publication of this notice. Parties who submit arguments in this proceeding are requested to submit with each argument: (1) a statement of the issue and (2) a brief summary of the argument. Further, we would appreciate it if parties submitting written comments would provide the Department with an additional copy of the public version of any such comments on diskette. All case briefs must be submitted within 30 days of the date of publication of this notice. Rebuttal briefs, which are limited to issues raised in the case briefs, may be filed not later than seven days after the

case briefs are filed. A hearing, if requested, will be held two days after the date the rebuttal briefs are filed or the first business day thereafter.

The Department will publish a notice of the final results of this administrative review, which will include the results of its analysis of the issues raised in any written comments or at the hearing, within 120 days from the publication of these preliminary results.

The Department shall determine, and Customs shall assess, antidumping duties on all appropriate entries. Upon completion of this review, the Department will issue appraisal instructions directly to Customs. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the determination and for future deposits of estimated duties. For duty assessment purposes, we calculated a per-unit customer or importer-specific assessment rate by aggregating the dumping margins calculated for all U.S. sales to each customer/importer and dividing this amount by the total quantity of those sales. Where the assessment rate is above *de minimis*, we will instruct the U.S. Customs Service to assess duties on all entries of subject merchandise by that importer.

Furthermore, the following deposit requirements will be effective for all shipments of silicon metal from Brazil entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Act: (1) the cash deposit rates for the reviewed companies will be those established in the final results of this review except if the rate is less than 0.5 percent, and therefore, *de minimis*, the cash deposit rate will be zero; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) for all other manufacturers and/or exporters of this merchandise, the cash deposit rate will continue to be 91.06 percent, the "all others" rate established in the LTFV investigation. These requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a preliminary reminder to importers of their

responsibility under 19 CFR 351.402(f) of the Department's regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.221.

Dated: July 31, 2002.

#### Associated Universities, Inc.; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW, Washington, DC.

*Docket Number:* 02-016. *Applicant:* Associated Universities, Inc., National Radio Astronomy Observatory, Charlottesville, VA 22903. *Instrument:* Atacama Large Millimeter Array (ALMA) Radio Telescope. *Manufacturer:* Vertex Antennentechnik GmbH, Germany. *Intended Use:* See notice at 67 FR 35961, May 22, 2002.

*Comments:* None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* The foreign instrument provides: (1) Extremely high surface precision (25.0  $\mu\text{m}$ ) and pointing accuracy (0.6 arcseconds), (2) a structure immune to changes in temperature, (3) high speed motion and (4) operation from 30-950 GHz. The Harvard-Smithsonian Center for Astrophysics advised July 30, 2002 that (1) these capabilities are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or

apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

#### University of Vermont; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW, Washington, DC.

*Docket Number:* 02-012R. *Applicant:* University of Vermont, Burlington, VT 05405. *Instrument:* Slow Scan CCD Camera System, Model TemCam-0124. *Manufacturer:* Tietz Video and Image Processing Systems GmbH, Germany. *Intended Use:* See notice at 67 FR 34903, May 16, 2002.

*Comments:* None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides: (1) Superior resolution by matching the surface of the fiber optic coupling to the shape of the CCD chip surface, permitting determination of the quality of cryo samples needed to assess areas suitable for tomography and (2) accommodation for a high resolution CRT screen. The National Institutes of Health advises in its memorandum of July 16, 2002 that (1) these capabilities are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value

to the foreign instrument which is being manufactured in the United States.

### National Institute of Standards and Technology

[Docket No.: 020724177-2177-01]

#### Notice of Intent To Update Infrared Spectral Library

**AGENCY:** National Institute of Standards and Technology, Commerce.

**ACTION:** Notice and request for comments.

**SUMMARY:** The National Institute of Standards and Technology announces its intent to add condensed phase infrared spectra to its current library of gas phase infrared spectra. The update will include approximately 10,000 spectra of diverse compounds digitized from the published spectra of the Coblenz Society. Interested parties are invited to submit comments to the address below.

**DATES:** Comments must be received by September 9, 2002.

**ADDRESSES:** Comments should be sent to the attention of Dr. Stephen Stein at the National Institute of Standards and Technology, Mail Stop 8380, 100 Bureau Drive, Gaithersburg, MD 20899-8380.

**FOR FURTHER INFORMATION CONTACT:** Dr. Stephen Stein by writing to the above address or by e-mail at [stephen.stein@nist.gov](mailto:stephen.stein@nist.gov) or by telephone at (301) 975-2444.

**SUPPLEMENTARY INFORMATION:** As part of its responsibilities under Title 15 U.S.C. 290 to collect, evaluate and publish high quality Standard Reference Data (SRD), NIST creates and maintains evaluated SRD databases. NIST currently distributes a gas phase infrared library containing spectra for approximately 6,000 discrete chemical substances. The database is primarily used to aid in the application of infrared spectroscopy to chemical analysis and to assist in identification of chemical compounds by providing a source for reference spectra for comparison to spectra acquired by instruments. For each spectrum, auxiliary information for chemical identification is provided, including chemical names, formulas, chemical structures and related information. The planned update will

add approximately 10,000 spectra for compounds primarily in the condensed phase which have been digitized (vectorized) from existing hard copy versions of the spectra. They will also contain the auxiliary information described above. These spectra, which have been published by the Coblenz Society, have been highly evaluated and have long been widely available in reference books. The new spectra add coverage of compounds in the condensed phase to current NIST collections and also enable the use of this spectral information by digital data systems. We invite comments concerning this update.

Dated: August 1, 2002.

#### Notice of Inventions Available for Licensing

**AGENCY:** National Institute of Standards and Technology, Commerce.

**ACTION:** Notice of inventions available for licensing.

**SUMMARY:** The inventions listed below are owned in whole or in part by the U.S. Government, as represented by the Department of Commerce. The Department of Commerce's interest in the inventions is available for licensing in accordance with 35 U.S.C. 207 and 37 CFR part 404 to achieve expeditious commercialization of results of federally funded research and development.

**FOR FURTHER INFORMATION CONTACT:** Technical and licensing information on these inventions may be obtained by writing to: National Institute of Standards and Technology, Office of Technology Partnerships, Attn: Mary Clague, Building 820, Room 213, Gaithersburg, MD 20899. Information is also available via telephone: 301-975-4188, e-mail: [mclague@nist.gov](mailto:mclague@nist.gov), or fax: 301-869-2751. Any request for information should include the NIST Docket number and title for the relevant invention as indicated below.

**SUPPLEMENTARY INFORMATION:** NIST may enter into a Cooperative Research and Development Agreement ("CRADA") with the licensee to perform further research on the inventions for purposes of commercialization. The inventions available for licensing are:
