D. What Information is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burdens of the proposed collections of information.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

IV. What Information Collection Activity or ICR Does this Action Apply to?

EPA is seeking comments on the following ICR:

Title: Reporting and Recordkeeping Requirements under EPA's Hospitals for a Healthy Environment (H2E) Program.

ICR numbers: EPA ICR No. TBD, OMB No. 2070-TBD.

ICR status: This ICR is a new proposed information collection that has not been approved by OMB. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that is subject to approval under PRA, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on

the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Abstract: The Hospitals for a Healthy Environment (H2E) program is a voluntary partnership program jointly administered by EPA and the American Hospital Association (AHA) that helps hospitals enhance work place safety, reduce waste and waste disposal costs, and become better environmental stewards and neighbors. The program is based on a 1998 Memorandum of Understanding signed by AHA and EPA to provide health care professionals with the tools and information necessary to reduce mercury waste, reduce the overall volume of waste, and identify pollution prevention opportunities.

The H2E program has two elements, the Partners for Change Program and the Champions for Change Program. The Partners for Change Program recognizes health care facilities that pledge support to the H2E mission and develop goals for reducing waste and mercury in their own facilities. The Champions for Change Program recognizes organizations that encourage and aid health care facilities to participate as H2E partners, provide on-going promotional or technical assistance information, or make changes that support the goals of the H2E program in their own institutions. An organization's decision to participate in the H2E program is completely voluntary.

This information collection addresses reporting and recordkeeping activities that support the administration of the H2E program. Responses to the collection of information are voluntary. Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

V. What are EPA's Burden and Cost Estimates for this ICR?

Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing

and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this collection of information is estimated to range between 0.5 and 20 hours per response, depending upon the type of information the respondent provides. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: 550.

Frequency of response: Annually.

Estimated average number of responses for each respondent: 1.

Estimated total annual burden hours: 10,110.

Estimated total annual burden costs: \$343,765.

VI. Are There Changes in the Estimates from the Last Approval?

No. This is a new proposed ICR.

VII. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
