Proposed Project

National Nursing Home Survey (OMB No. 0920-0353)—Reinstatement with Change—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC). Section 306 of the Public Health Service Act states that the National Center for Health Statistics “shall collect statistics on health resources * * * [and] utilization of health care, including utilization of * * * services of hospitals, extended care facilities, home health agencies, and other institutions.” The data system responsible for collecting this data is the National Health Care Survey (NHCS). The National Nursing Home Survey (NNHS) is part of the Long-term Care Component of the NHCS. The NNHS was conducted in 1973–74, 1977, 1985, 1995, 1997, and 1999. NNHS data

describe a major segment of the long-term care system and are used extensively for health care research, health planning and public policy. NNHS provides data on the characteristics of nursing homes in relation to their residents and staff, Medicare and Medicaid certification, basic rates for Medicaid and private pay residents, sources of payment, residents' functional status and diagnoses. The survey provides detailed information on utilization patterns and quality of care that is needed in order to make accurate assessments of the need for and effects of changes in the provision and financing of long-term care for the elderly. The use of long-term care services is becoming an increasingly important issue as the number of elderly increases and persons with disabilities live longer. Data from the NNHS have been used by the National Immunization Program at CDC, the Office of the U.S. Attorney General, the

Bureau of Health Professionals at the Health Resources and Services Administration, the National Institute of Dental and Craniofacial Research at the National Institutes of Health, the Agency for Healthcare Research and Quality, the American Health Care Association, Johnson and Johnson Pharmaceutical, the Rand Corporation, AARP, National Academy of Social Insurance, and by newspapers and journals. NCHS plans to conduct the next NNHS in September–December 2003. This national survey will be preceded by a pretest of forms and procedures in January–February 2003. The data collection forms and procedures have been extensively revised from the previous NNHS. The 2003 NNHS will be based on computer-assisted personal interview (CAPI) methodology. The estimated annualized burden for this data collection is 31,258 hours.

Pretest

Forms	Number of respondents	Number of responses/respondent	Average burden/response (in hrs.)
Facility Questionnaire	100	1	20/60
Nursing Home Staff Questionnaire	100	1	2.5
Current Resident Sampling List	100	1	20/60
Current Resident Questionnaire	100	8	25/60
Discharged Resident Sampling List	100	1	15/60
Discharged Resident Questionnaire	100	8	25/60

Full Survey

Forms	Number of respondents	Number of responses/respondent	Average burden/response (in hrs.)
Facility Questionnaire	3,000	1	20/60
Nursing Home Staff Questionnaire	3,000	1	2.5
Current Resident Sampling List	3,000	1	20/60
Current Resident Questionnaire	3,000	8	25/60
Discharged Resident Sampling List	3,000	1	15/60
Discharged Resident Questionnaire	3,000	8	25/60

Dated: August 13, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

Advisory Committee to the Director, National Center for Environmental Health (NCEH): Notice of Charter Renewal

This gives notice under the Federal Advisory Committee Act (Pub. L. 92-463) of October 6, 1972, that the Advisory Committee to the Director, National Center for Environmental Health, Centers for Disease Control and

Prevention of the Department of Health and Human Services, has been renewed for a 2-year period extending through August 2, 2004.

FOR FURTHER INFORMATION CONTACT: Kent Taylor, Acting Executive Secretary, NCEH, 4770 Buford Highway, N.E., m/s F-29, Atlanta, Georgia 30341-3724. Telephone 770/488-7020, or fax 770/488-7024, e-mail KXT1@cdc.gov.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and

Prevention and the Agency for Toxic Substances and Disease Registry.

Dated: August 14, 2002.

Joseph E. Salter,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Savannah River Site Health Effects Subcommittee (SRSHES)

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC), and the Agency for Toxic Substances and Disease Registry (ATSDR) announce the following meeting.

Name: Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Savannah River Site Health Effects Subcommittee (SRSHES).

Times and Dates:

8 a.m.–4:30 p.m., September 5, 2002

8 a.m.–11:45 a.m., September 6, 2002

Place: Crowne Plaza, 130 Shipyard Drive, Hilton Head Island, South Carolina 29928, telephone 843-842-2400, fax 843-842-9972.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Background: Under a Memorandum of Understanding (MOU) signed in December 1990 with DOE, and replaced by MOUs signed in 1996 and 2000, the Department of Health and Human Services (HHS) was given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, a memo was signed in October 1990 and renewed in November 1992, 1996, and in 2000, between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities

such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This subcommittee is charged with providing advice and recommendations to the Director, CDC, and the Administrator, ATSDR, regarding community concerns pertaining to CDC's and ATSDR's public health activities and research at this DOE site. The purpose of this meeting is to provide a forum for community interaction and to serve as a vehicle for community concerns to be expressed as advice and recommendations to CDC and ATSDR.

Matters to be Discussed: Agenda items include: Savannah River Site (SRS) Monitoring Program and Annual Environmental Report; Georgia Department of Health Monitoring Program at SRS; South Carolina Department of Health Monitoring Program at SRS; and ATSDR/Tritium Health Consult on Potential Tritium Exposures at SRS. Agenda items are subject to change as priorities dictate.

Contact Person For More Information:

Phillip Green, Executive Secretary, SRSHES, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, National Center for Environmental Health, CDC, 1600 Clifton Road, NE (E-39), Atlanta, Georgia 30333, telephone (404) 498-1800, fax (404) 498-1811, e-mail PGreen@cdc.gov.

Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact Phillip Green at least ten (10) working days before the scheduled date of the meeting.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both CDC and ATSDR.

Dated: August 14, 2002.

Joseph E. Salter,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

[Program Announcement 02223]

The Effect of *Trichomonas vaginalis* Infection on Vaginal Virus Loads Among HIV-Infected Women—Tulane University Health Sciences Center; Notice of Award of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the award of fiscal year (FY) 2002 funds for a grant program, "The Effect of *Trichomonas vaginalis* Infection on Vaginal Virus

Loads among HIV-Infected Women" to be performed by Tulane University Health Sciences Center, School of Public Health and Tropical Medicine.

Detection and treatment of *Trichomonas vaginalis* (T. vaginalis) among HIV-infected women may be an important public health strategy in reducing the spread of HIV infection. This is of profound public health importance, as it would advance medical knowledge in the relationship between T. vaginalis (the most common non-viral STD among HIV-infected women) and vaginal shedding of the HIV virus.

The study may lead to a determination of whether or not the effective treatment of T. vaginalis would result in a reduction in the spread of HIV. This study falls under the public health initiative Human Immunodeficiency Virus (HIV) Prevention.

B. Eligible Applicant

Assistance is provided only to Tulane University Health Sciences Center, School of Public Health and Tropical Medicine. Tulane's application contained an important and unique scientific proposal that was not submitted in response to any existing program announcement, but does fall under the embrace of the Government's public health initiative Human Immunodeficiency Virus (HIV) Prevention. The research team at Tulane has a strong background in conducting similar studies. They are the largest provider of care to women co-infected with HIV and T. vaginalis in the gulf south region. They have the research, clinical, and laboratory expertise needed to conduct such a study. The CDC Division of Sexually Transmitted Disease Prevention (DSTD) performed a thorough review of Tulane's proposal and determined that it would significantly advance the state of medical knowledge, and provide a unique contribution to the understanding of T. vaginalis and HIV infectivity.

C. Funds

Approximately \$149,979 is being awarded in FY 2002. The award will begin on or about September 15, 2002, and will be made for a 24-month budget period within a project period of two years.

D. Where To Obtain Additional Information

Business management technical assistance may be obtained from: William J. Ryan, Jr., Grants Management Officer, Procurement and Grants Office,
