

316, 103d Cong., 2d Sess. 870 (1994) ("SAA") at 873 provides that we may use other reasonable methods. Because the petition contained only an estimated price-to-price dumping margin, which the Department adjusted for purposes of initiation, there are no additional estimated margins available with which to create the "all others" rate. Therefore, we applied the published margin of 49.86 percent as the "all others" rate.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing the Customs Service to continue to suspend liquidation of all entries of subject merchandise from Mexico that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the *Preliminary Determination* in the **Federal Register**. The Customs Service shall continue to require a cash deposit or posting of a bond equal to the estimated amount by which the normal value exceeds the U.S. price as shown below. The suspension of liquidation instructions will remain in effect until further notice.

STAINLESS STEEL BUTT-WELD PIPE FITTINGS

Producer/Manufacturer/Exporter	Weighted-average margin (percent)
PMT-Tubacero	49.86
All Others	49.86

ITC Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission ("ITC") of our final determination. As our final determination is affirmative, the ITC will, within 45 days, determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing Customs to assess antidumping duties on all imports of the subject merchandise entered or withdrawn from warehouse for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding APO

This notice also serves as a reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of the APO is a sanctionable violation.

This determination is issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: December 28, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

Appendix

Issues in the Decision Memo

1. The Department should continue to collapse respondent Productora Mexicana de Tuberia, S.A. de C.V. ("PMT") with its affiliate, Tubacero, S.A. de C.V. ("Tubacero").

2. The Department should apply adverse facts available in determining the antidumping duty margin.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

National Estuarine Research Reserve System: Sediment Retention System in Goat Canyon Creek and Watershed at Tijuana National Estuarine Research Reserve

AGENCY: Estuarine Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of availability of the Final Environmental Impact Statement/Environmental Impact Report on a proposed sediment retention system in the Goat Canyon Creek and watershed at the Tijuana River National Estuarine Research Reserve, Imperial Beach, California.

SUMMARY: Pursuant to the National Environmental Policy Act and the California Environmental Quality Act, the National Ocean Service (NOS), in cooperation with California Department of Parks and Recreation and California Coastal Conservancy, has completed the

preparation of a joint Final Environmental Impact Statement/Environmental Impact Report (FEIS/EIR) addressing the potential effects on the human and natural environment that may result from construction of sedimentation, flood control and other facilities within and adjacent to Goat Canyon, and the elevation and/or realignment of Monument Road through Border Field State Park lands. The purpose of these proposed facilities is to enhance the existing Goat Canyon Creek and its natural habitat communities, including the Tijuana River Estuary, through the management of sediment within the canyon and on the adjacent alluvial fan.

The proposed project is in conformance with the Final Goat Canyon/Cañon de los Laureles Enhancement Plan prepared by the Southwest Wetlands Interpretive Association (SWIA) and California Coastal Conservancy. As a result of the construction of sedimentation basins, it is anticipated that Goat Canyon Creek, its watershed, and the Tijuana River Estuary will be enhanced.

The Final EIS/EIR is available for public review. All comments received, including names and addresses, will become part of the administrative record and be made available to the public. NOAA is not required to respond to comments received as a result of issuance of the FEIS/EIR, however comments will be reviewed and considered for their impact on issuance of a Record of Decision (ROD). The ROD will be printed in the **Federal Register** some time after the close of the public review period.

DATES: The review period for the joint Final EIS/EIR will end on Monday, February 4, 2002. All written comments received by this deadline will be considered in the preparation of the ROD.

ADDRESSES: Written comments on the joint Final EIS/EIR should be sent to Nina Garfield, NOAA, Estuarine Reserves Division, SSMC-4, 11th Floor, 1305 East-West Highway, Silver Spring, Maryland, 20910-3281.

FOR FURTHER INFORMATION CONTACT: Mayda Winter, Goat Canyon Enhancement Project, Southwest Wetlands Interpretive Association, 925 Seacoast Drive, Imperial Beach, California, 91932, tel. (619) 575-0550.

SUPPLEMENTARY INFORMATION: Goat Canyon Creek is located in the far western portion of the greater Tijuana River Watershed approximately one mile inland from the Pacific Ocean. The watershed is characterized by steep slopes, sandy soils with cobbles,

pockets of native coastal sage scrub, riparian vegetation, and a high level of human-induced disturbance, especially during the last 20 to 30 years. A prominent result of changes in the watershed has been a significant increase in sediment yield in response to higher volumes of runoff and an increased sediment supply throughout the watershed. Increased sedimentation has adversely affected the local habitat communities of Goat Canyon and downstream within the Tijuana River Estuary. By the mid-1980s, it was estimated that erosion and sedimentation had resulted in the loss of 30 acres of intertidal wetland area in the Tijuana River Estuary. The composition and distribution of native habitat communities along the creek and on the alluvial fan have been altered, as has the morphology of the creek. Further, during storm events, sediment is deposited on Monument Road, which in turn blocks public access to Border Field State Park and impedes the U.S. Border Patrol.

On August 10, 2000, the National Ocean Service published in the **Federal Register** a Notice of Intent to prepare a joint Environmental Impact Statement/Environmental Impact Report (Vol. 65 No. 155, 48971-48972). The stated intent of the proposed project was to enhance the existing Goat Canyon Creek and its natural habitat communities, including the Tijuana River Estuary, through the management of sediment within the canyon and on the adjacent alluvial fan. A notice announcing the availability of the draft EIS/EIR was published on October 12, 2001.

The final EIS/EIR examines the potential effects of the No Project Alternative and four project alternatives for construction of a sedimentation retention system within Goat Canyon and the alluvial fan. NOAA has identified Alternative D-1 as the Preferred Alternative based on an evaluation of the comparison of the impacts between the alternatives.

Alternative D-1 features an in-canyon diversion structure and sedimentation basin system consisting of two basins in series to capture the flow in Goat Canyon Creek. The system has been designed to contain the full 100-year flood event. The Preferred Alternative also involves construction of access roads around the basins, staging areas adjacent to the basins, a visual berm located between the basins and Monument Road, improvements to part of Monument Road and a multi-purpose trail, and creation of wetland habitat. The Preferred Alternative would be the most efficient at capturing sediment and would result in the least impacts to

sensitive wetland habitats and endangered species.

Document Availability

Copies of the final EIS/EIR are available for review at the California State Parks, San Diego Coast District Office, 9609 Waples, Suite 200, San Diego, California, 92108, (858) 642-4200, the Tijuana River National Estuarine Research Reserve at 301 Caspian Way, Imperial Beach, California 91932, (619) 575-3613, and at the Imperial Beach Public Library, 810 Imperial Beach Boulevard, Imperial Beach, 91932, (619) 424-6981.

Federal Domestic Assistance Catalog Number 11.420 (Coastal Zone Management) Research Reserves

Dated: December 21, 2001.

Alan Neuschatz,

Associate Assistant Administrator for Management, Ocean Services and Coastal Zone Management.

BILLING CODE 3510-08-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 120701C]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting and cancellation of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Ad Hoc Groundfish Multi-Year Management Committee (GMMC) will hold a work session, which is open to the public. A previously noticed meeting of the GMMC is canceled.

DATES: The GMMC meeting noticed for Thursday, January 10, 2002, and Friday, January 11, 2002, is cancelled (see 66 FR 64954, December 17, 2001). Instead, the GMMC will meet Thursday, January 31, 2002, from 10 a.m. until 5 p.m.; and Friday, February 1, 2002, from 8 a.m. until business for the day is completed.

ADDRESSES: The work session will be held at the Pacific Fishery Management Council, West Conference Room, 7700 NE Ambassador Place, Suite 200, Portland, OR 97220; telephone: 503-326-6352.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 200, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Mr. Dan Waldeck or Dr. Don McIsaac, Pacific Fishery Management Council, 503-326-6352.

SUPPLEMENTARY INFORMATION: The formation of this ad hoc committee is in response to the Council's request for a committee to scope multi-year management approaches for the West Coast groundfish fishery. Multi-year management of the groundfish fishery would be synchronized with a multi-year groundfish stock assessment schedule. Full accommodation of federal notice and comment requirements would also be incorporated into the multi-year cycle. This is the second meeting of the committee, and the primary purpose of the meeting is to further develop the purpose and objectives of multi-year management, as well as alternative multi-year management approaches.

Although nonemergency issues not contained in the GMMC meeting agenda may come before the GMMC for discussion, those issues may not be the subject of formal GMMC action during the meeting. GMMC action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the GMMC's intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Carolyn Porter at 503-326-6352 at least 5 days prior to the meeting date.

Dated: December 31, 2001.

Dean Swanson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
