

DEPARTMENT OF THE INTERIOR**Bureau of Land Management****[NV-930-1430-ET; N-75879]****Notice of Proposed Withdrawal and Opportunity for Public Meeting; Nevada****AGENCY:** Bureau of Land Management, Interior.**ACTION:** Notice.

SUMMARY: The Bureau of Land Management proposes to withdraw a 208.72 acres of public land from surface entry and mining for a period of 20 years to protect public health and safety from land contaminated by previous mining and milling operations. This notice closes the land from surface entry and mining for up to 2 years while various studies and analyses are made to make a final decision on the withdrawal application.

DATES: Comments and requests for a meeting should be received on or before December 10, 2002.

ADDRESSES: Comments and meeting requests should be sent to the Nevada State Director, BLM, 1340 Financial Blvd., P.O. Box 12000, Reno, Nevada 89520-0006.

FOR FURTHER INFORMATION CONTACT: Dennis J. Samuelson, BLM Nevada State Office, 775-861-6532.

SUPPLEMENTARY INFORMATION: On August 9, 2002, a petition was approved allowing the Bureau of Land Management to file an application to withdraw the following described public land from settlement, sale, location, or entry under the general land laws, including the mining laws, subject to valid existing rights:

Mount Diablo Meridian

T 21 N., R. 23 E., Sec. 32, lots 9, 10, 14, 15, and 16.

The area described contains 208.72 acres in Lander County.

The purpose of the proposed withdrawal is to protect the public health and safety as well as to prevent the filing of mining and mill site claims which would interfere with the reclamation of the Olinghouse Mine site. The Olinghouse Mine was the site of mining and milling operations for many years. The area contains two open pits, haul roads, heap leach pad, buildings, and ponds that can be hazardous to the public. The Bureau of Land Management intends to reclaim the site. A withdrawal would preclude the filing of mining and mill site claims while the site is being reclaimed.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Nevada State Director of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Nevada State Director within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting. The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date.

Other uses which will be permitted during this segregative period are rights-of-way, leases, and permits.

Dated: August 14, 2002.

Jim Stobaugh,
Lands Team Lead.

Environmental Assessment for Proposal To Construct Odor Treatment Units for the Potomac Interceptor Sewer and Improvements to a Parking Area and Two New Comfort Stations for the C&O Canal National Historical Park

AGENCY: National Park Service, Interior.

ACTION: Availability of the Environmental Assessment for the proposal to construct odor treatment units for the Potomac Interceptor sewer and improvements to a parking area and two new comfort stations for the C&O Canal National Historical Park.

SUMMARY: Pursuant to Council on Environmental Quality regulations and National Park Service policy, the National Park Service announces the availability of an Environmental Assessment for the construction of four odor treatment units for the Potomac Interceptor (PI) sewer and improvements to a parking area and two new comfort stations for the C&O Canal National Historical Park (CHOP). In public use areas along the CHOP and the Clara Barton Parkway (which is administered by the George Washington Memorial Parkway (GWMP)), odorous air is intermittently exhausted from the PI sewer due to several dynamic hydraulic changes in the PI. Sewer odors emitted from the PI have resulted in the completion of an odor study, the implementation of interim odor controls, and the development of the long-term odor abatement program for several areas of the PI. This Environmental Assessment examines several alternatives for implementing four odor control facilities to control nuisance odors along the CHOP and the Clara Barton Parkway, as well as to indicate environmental impacts of the proposed construction of two comfort stations in CHOP access areas, and to improve the parking area at the Anglers Inn C&O Canal access area. The National Park Service is soliciting comments on this Environmental Assessment. These comments will be considered in evaluating it and making decisions pursuant to the National Environmental Policy Act (NEPA).

DATES: The Environmental Assessment will remain available for public comment on or before October 11, 2002. Written comments should be received no later than this date. A public meeting will be scheduled at the Glen Echo Community Center during the public comment period to provide responses to
