Nonimmigrant aliens subject to special registration may not make final registration and depart the United States through any location not listed above.

#### **Notice of Where To Report for Final Registration and Departure**

Upon admission to the United States, each nonimmigrant alien subject to special registration will be issued an information packet that will list each designated port of departure and other instructions on how to comply with 8 CFR 264.1. This packet will also contain specific information regarding hours of operation, directions, and contact numbers.

The list of ports-of-entry through which nonimmigrant aliens subject to special registration must make final registration and depart will become effective on October 1, 2002. Due to the critical and immediate national security concerns of this program the Service

must limit the ports-of-departure to effectively capture departure data, given the limited availability of current resources, specifically departure staff and facilities. As the available ports-of-entry are expanded, the Service will publish subsequent notices in the **Federal Register** and make the list available at Service Offices and on its Web site at <http://www.ins.usdoj.gov>.

##### **Availability of Guidelines for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by the National Science Foundation**

**AGENCY:** National Science Foundation.

**ACTION:** Notice of availability of guidelines.

**SUMMARY:** The National Science Foundation hereby announces the availability of its information quality guidelines on its website. The guidelines contain NSF's standards of quality, utility, objectivity, and integrity for information that is disseminated to the public, and the administrative

procedures for preparing, reviewing, and disseminating information products. The guidelines also describe the mechanisms for the public to request correction of information, and to request reconsideration of an NSF decision to deny a request for correction. The report will be available electronically at <http://www.nsf.gov/home/pubinfo/infoqual.htm> on October 1, 2002.

**DATES:** The information quality guidelines will be effective as of October 1, 2002.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-244]

### Rochester Gas and Electric Corporation, R.E. Ginna Nuclear Power Plant; Notice of Acceptance for Docketing of the Application and Notice of Opportunity for a Hearing Regarding Renewal of Facility Operating License No. DPR 18 for an Additional 20-year Period

The U.S. Nuclear Regulatory Commission (the Commission) is considering an application for the renewal of Operating License No. DPR-18, which authorizes Rochester Gas and Electric Corporation to operate R.E.

Ginna Nuclear Power Plant, at 1520 megawatts thermal. The renewed licenses would authorize the applicant to operate the R.E. Ginna Nuclear Power Plant for an additional 20 years beyond the period specified in the current licenses. The current operating license for R.E. Ginna Nuclear Power Plant expires on September 18, 2009.

On August 1, 2002, the Commission received an application from Rochester Gas and Electric Corporation to renew the operating license for the R.E. Ginna Nuclear Power Plant. A Notice of Receipt of Application, "R.E. Ginna Nuclear Power Plant Notice of Receipt of Application for Renewal of Facility Operating License No. DPR-18 for an Additional 20-year Period," was published in the **Federal Register** on August 26, 2002, (67 FR 54825).

The Commission's staff (the staff) has determined that Rochester Gas and Electric Corporation has submitted information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, and 51.53(c) that is complete and acceptable for docketing. The current Docket No. 50-244, for Operating License No. DPR-18, will be retained. The docketing of the renewal application does not preclude requesting additional information as the review proceeds, nor does it predict whether the Commission will grant or deny the application.

Before issuance of each requested renewed license, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. In accordance with 10 CFR 54.29, the Commission will issue a renewed license on the basis of its review if it finds that actions have been identified and have been or will be taken with respect to (1) Managing the effects of aging during the period of extended operation on the functionality of structures and components that have been identified as requiring aging management review, and (2) time-limited aging analyses that have been identified as requiring review, such that there is reasonable assurance that the activities authorized by the renewed license will continue to be conducted in accordance with the current licensing basis (CLB) and that any changes made to the plant's CLB comply with the Act and the Commission's regulations.

Additionally, in accordance with 10 CFR 51.95(c), the Commission will prepare an environmental impact statement that is a supplement to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants" (May 1996). Pursuant to 10 CFR 51.26, and as part of the environmental scoping process,

the staff intends to hold a public scoping meeting. Detailed information regarding this meeting will be included in a future **Federal Register** notice. The Commission also intends to hold public meetings to discuss the license renewal process and the schedule for conducting the review. The Commission will provide prior notice of these meetings. As discussed further herein, in the event that a hearing is held, issues that may be litigated will be confined to those pertinent to the foregoing.

Within 30 days from the date of publication of this **Federal Register** notice, the applicant may file a request for a hearing, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene with respect to the renewal of the licenses in accordance with the provisions of 10 CFR 2.714.

The most recent version of Title 10 of the Code of Federal Regulations, published January 1, 2002, inadvertently omitted the last sentence of 10 CFR 2.714(d) and subparagraphs (d)(1) and (2), regarding petitions to intervene and contentions. Those provisions are extant and still applicable to petitions to intervene. Those provisions are as follows:

In all other circumstances, such ruling body or officer shall, in ruling on—

(1) A petition for leave to intervene or a request for hearing, consider the following factors, among other things: (i) The nature of the petitioner's right under the Act to be made a party to the proceeding. (ii) The nature and extent of the petitioner's property, financial, or other interest in the proceeding. (iii) The possible effect of any order that may be entered in the proceeding on the petitioner's interest.

(2) The admissibility of a contention, refuse to admit a contention if: (i) The contention and supporting material fail to satisfy the requirements of paragraph (b)(2) of this section; or (ii) The contention, if proven, would be of no consequence in the proceeding because it would not entitle petitioner to relief.

Interested persons should consult a current copy of 10 CFR 2.714, which is available at the Commission's Public Document Room (PDR), 11555 Rockville Pike (first floor) Rockville, Maryland, and on the Commission's Web site at <http://www.nrc.gov> (the Public Electronic Reading Room). If a request for a hearing or a petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the
