SUPPLEMENTARY INFORMATION: On October 16, 2001, the President created the Board by Executive Order 12321. The President noted that "[t]he information technology revolution has changed the way business is transacted,

government operates, and national defense is conducted. Those three functions now depend on an interdependent network of critical information infrastructures." In the Executive Order, the President directed the Board to "recommend policies and coordinate programs for protecting information systems for critical infrastructure," and called for the Board to "coordinate outreach to and consultation with the private sector, * * * State and local governments, [and] communities and representatives from academia and other relevant elements of society."

Pursuant to the President's charge, the Board has been engaged in development of the National Strategy to Secure Cyberspace. The Strategy was made available online at <http://www.securecyberspace.gov> for viewing and downloading.

The Strategy was developed based on input from a broad spectrum of individuals and groups that represent the owners and operators of cyberspace, as well as from the key sectors that rely on cyberspace, including Federal departments and agencies, private companies, State and local governments, educational institutions, nongovernmental organizations, and the general public. Town hall meetings to facilitate discussion and stimulate input were held during the Spring in Denver, Chicago, Portland, Oregon, and Atlanta and this month in Philadelphia and Boston. In addition, a list of 53 key questions was compiled, published, and publicized to spark public debate and facilitate informed input. The Board will convene additional town hall meetings around the country in the next few weeks to raise awareness about cybersecurity issues, and to solicit and receive the views and input of concerned citizens regarding the Strategy.
