Comments must be received on or before the end of the comment period at the address listed below. No public meetings, open houses, or field tours of the project area have been scheduled at this time. If there is sufficient public interest, public meetings will be arranged to discuss the management alternatives and answer questions. At least 15 days public notice will be given for activities where the public is invited to attend. All meetings will be published on the Vale District Web site <http://www.or.blm.gov/Vale/Planning-EnvirnAnalyses.htm> and in the Baker City Herald and Argus-Observer (Ontario) newspapers. Comments, including names and addresses of commentors, will be available for public review. Individual respondents may request confidentiality. If you wish to withhold your name and/or address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

ADDRESSES: The responsible field official is Penelope Dunn Woods, Baker Resource Area Manager. SUPPLEMENTARY INFORMATION: The DEIS contains descriptions and analyses of five action alternatives, and a no-action alternative, each developed with differing emphasis. The range of management direction includes

commercial and precommercial timber harvest, riparian restoration activities, road relocation and decommissionings, fuel hazard reduction treatments including prescribed burning, and other land management direction. The portions of the Baker Resource Management Plan that would be most affected and amended by the action alternatives involve visual resource management and alternative road access. The action alternatives would support the National Fire Policy. There are no identified substantive adverse effects on energy resources or transmission. Public comments were considered in developing and analyzing issues and alternatives, along with input from local and Tribal governments, known interest groups, and data developed by BLM staff. The alternatives were designed to address, in different ways, the land and resource management issues identified in the early stages of the planning process. There were no requests for formal cooperator status by other federal, state, local or Tribal governments.

Authority: Federal Land Policy and Management Act (FLPMA) and the National Environmental Policy Act (NEPA).

SUPPLEMENTARY INFORMATION:

Background.—The final phase of this investigation is being scheduled as a result of an affirmative preliminary determination by the Department of Commerce that imports of certain ball bearings and parts thereof from China are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. 1673b). The investigation was requested

¹For purposes of this investigation, the Department of Commerce has defined the subject merchandise as "antifriction bearings, regardless of size, precision grade or use, that employ balls as the rolling element (whether ground or unground) and parts thereof (inner ring, outer ring, cage, balls, seals, shields, etc.) that are produced in China. Imports of these products are classified under the following categories: antifriction balls, ball bearings with integral shafts and parts thereof, ball bearings (including thrust, angular contact, and radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof. The scope includes ball bearing type pillow blocks and parts thereof; and wheel hub units incorporating balls as the rolling element. With regard to finished parts, all such parts are included in the scope of the petition. With regard to unfinished parts, such parts are included if (1) they have been heat-treated, or (2) heat treatment is not required to be performed on the part. Thus, the only unfinished parts that are not covered by the petition are those that will be subject to heat treatment after importation."

The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of this investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigation. A party granted access to BPI in the preliminary phase of the investigation need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the final phase of this investigation will be placed in the nonpublic record on February 19, 2003, and a public version will be issued thereafter, pursuant to § 207.22 of the Commission's rules.
