#### Establishment of Class E Airspace; Tipton Airport, Fort Meade, MD

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action establishes Class E airspace at Tipton Airport, Fort Meade, MD. Development of Standard Instrument Approach Procedures (SIAP), to serve flights operating into the Tipton Airport under Instrument Flight Rules (IFR) has made this action necessary. Controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to contain aircraft executing the approach to the Tipton Airport.

**EFFECTIVE DATE:** 0901 UTC March 22, 2002.

**FOR FURTHER INFORMATION CONTACT:** Mr. Francis Jordan, Airspace Specialist, Airspace Branch, AEA-520, Air Traffic Division, Eastern Region, Federal Aviation Administration, 1 Aviation Plaza, Jamaica, New York 11434-4809, telephone: (718) 553-4521.

**SUPPLEMENTARY INFORMATION:**

#### History

On September 28, 2001 a notice proposing to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing Class E airspace extending upward from 700 feet Above Ground Level (AGL) for flights executing SIAPs to the Tipton Airport, Fort Meade, MD was published in the **Federal Register** (66FR 49573-49574).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA on or before October 29, 2001. No comments to the proposal were received. The rule is adopted as proposed. The coordinates for this airspace docket are based on North American Datum 83.

Class E airspace areas designations for airspace extending upward from 700

feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9J, dated August 31, 2001 and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published in the Order.

#### The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) provides controlled Class E airspace extending upward from 700 feet above the surface for aircraft conducting IFR operations at the Tipton Airport, Fort Meade, MD.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation it is certified that this rule will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**FOR FURTHER INFORMATION CONTACT:** Walter R. Cochran, Manager, Airspace Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5627.

**SUPPLEMENTARY INFORMATION:**

#### **Background**

Federal Register Document 00–7959, Airspace Docket No. 00–ASO–4, published on March 31, 2000, (65 FR 17133), established Class E5 airspace at Andrews—Murphy, NC. An error was discovered in the geographic coordinates describing the Class E5 airspace area. What should have been latitude 35 degrees was published as 34 degrees. This action corrects that error.

Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of

FAA Order 7400.9J, dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

### **Need for Correction**

As published, the final rule contains an error which identifies an incorrect geographical position for the location of the Class E5 airspace area. Accordingly, pursuant to the authority delegated to me, the geographic coordinates for the Class E5 airspace area at Andrews—Murphy, NC, incorporated by reference at § 71.1, 14 CFR 71.1, and published in the **Federal Register** on March 31, 2000, (65 FR 17133), is corrected by making the following correcting amendment.
