Background

On August 29, 2002, the Department received a timely request from petitioner NFC that we conduct an administrative review of the sales of Zhenxing Chemical Industry Company and Xinyu Chemical Plant. On September 25, 2002, the Department published a notice of initiation of the administrative review of the antidumping duty order on sulfanilic acid from the PRC for the period of review (POR) August 1, 2001, to July 31, 2002, in accordance with 19 CFR 351.221(c)(1)(i). National Oceanic and Atmospheric Administration

[I.D. 072202A]

Receipt of an Application for an Incidental Take Permit (1398)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce

ACTION: Issuance of Permit 1398.

SUMMARY: Notice is hereby given of that NMFS issued on August 30, 2002, an incidental take permit (Permit 1398) to the North Carolina Division of Marine

Fisheries (NCDMF) pursuant to the Endangered Species Act of 1973 (ESA), as amended. As required by the ESA, NCDMF's Permit 1398 includes a conservation plan designed to minimize and mitigate any such take of endangered or threatened species. Permit 1398 is for the incidental take of ESA-listed adult and juvenile sea turtles associated with otherwise lawful commercial fall gill net fisheries for flounder operating in Pamlico Sound, NC. The duration of Permit 1398 is for 3 years.

ADDRESSES: The application and related documents are available for review in the following office by appointment:

Endangered Species Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910 or Protected Resources Division, S/SER, 9721 Executive Center Dr. N., St. Petersburg, FL 33702 (ph: 727-570-5312, fax: 727-570-5517).

FOR FURTHER INFORMATION CONTACT:

Dennis Klemm (ph. 727-570-5312, fax 727-570-5517, e-mail

Dennis.Klemm@noaa.gov) or Therese

Conant (ph. 301-713-1401, fax 301-713-0376, e-mail

Therese.Conant@noaa.gov). Comments received will also be available for public inspection, by appointment, during normal business hours by calling 301-713-1401.

SUPPLEMENTARY INFORMATION: Issuance of permits and permit modifications, as required by the ESA (16 U.S.C. 1531-1543), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Incidental take permits are issued under Section 10(a)(1)(B) of the ESA. Authority to take listed species is subject to conditions set forth in the permits. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

Permit 1398

The following species are included in Permit 1398 conservation plan:

Loggerhead (*Caretta caretta*), green (*Chelonia mydas*), leatherback (*Dermochelys coriacea*), hawksbill (*Eretmochelys imbricata*), and Kemp's ridley (*Lepidochelys kempi*) sea turtles. The conservation plan includes managing the shallow water large and small mesh gill net fishery operating from September through mid-December in areas adjacent to the Outer Banks and mainland in Pamlico Sound. Permit

1398 includes measures to limit the commercial fall gill net fishery for flounder such that the incidental impacts on ESA-listed sea turtles will be minimized. NCDMF would use a variety of adaptive fishery management measures and restrictions through their state proclamation authority to reduce sea turtle mortality. Specific measures to be implemented each year include: (1) require tending for gillnets less than 5-inch (12.7-cm) stretched mesh from September 1 through October 31; (2) prohibit gillnets \leq 5-inch (\leq 12.7-cm) stretched mesh in areas adjacent to Ocracoke, Hatteras, and Oregon Inlets from September 1 through December 15; (3) restrict the maximum net per fishing operation to 2,000 yards (1,828 m); (4) require NCDMF-issued permits for individual fishing operations employing large mesh gillnets in restricted areas between September 1 and December 15; (5) monitor gear interactions through a mandatory observer program for large and small mesh gillnets as well as through reports from fishermen and NCDMF Marine Patrol.

Comments

NMFS published a notice of availability on July 29, 2002 (67 FR 49009), and requested comments on the NCDMF. Two comment letters were submitted with the following comments.

Comment 1: The 3-year duration for the permit may not allow for adjustments to management measures such as adding the small mesh fishery under the permit in subsequent years. In addition, the annual evaluation of the permit may not be as rigorous given the permit is already in hand.

Response. Annual renewal of this permit is not automatic. Yearly evaluation of this permit by NMFS will include re-analyses of all data and a re-assessment of the take levels prior to 2nd and 3rd year re-authorization. The permit requires weekly, monthly, and yearly reporting. This requirement is unchanged from the previous 1-year permits issued to NCDMF. NCDMF has agreed to modify the conservation plan to cover the small mesh fishery and to achieve 10 percent observer coverage for this component of the shallow water fishery.

Comment 2: Given a 12.5 percent mortality rate, the estimated lethal take should be 61 not 71 as identified in the application. The take levels should also be reviewed on a yearly basis with the goal to reduce both actual and authorized take.

Response. NMFS felt that the take levels authorized in the 2001 permit should not be used in Permit 1398 for 2002-2004. The spatial and temporal
