Agency: National

Telecommunications and Information Administration (NTIA).

Average Hours Per Response: 1. Needs and Uses: The purpose of the Technology Opportunities Program (TOP) is to promote the widespread availability and use of digital network technologies in the public and nonprofit sectors to serve communities nationwide. As part of the Department of Commerce's National Telecommunications and Information

It does this by providing matching funds to pubic and non-profit sector organizations to use these technologies to provide communitywide information, health, life-long learning, public safety and other public services. TOP will evaluate and actively share the lessons learned from these projects to ensure the benefits are broadly distributed. TOP will use this survey to ensure that grant recipients are effectively promoting the efficient and widespread use of advance telecommunications services to serve American communities and to comply with the Government Performance and Results Act.

NTIA is interested in the effects that the funded projects are having at the local level and, over the long term, at the national level. It is NTIA's intention to understand the nature and degree of those effects on the organizations that are involved with the projects, the individuals who are served by the projects, and the community as a whole. NTIA is especially interested in understanding the difference that the Federal grants have had in the creation, scale, scope and sustainability of the projects.
