Coast Guard

33 CFR Part 165

[CGD01-02-131]

RIN 2115-AA97

Safety and Security Zones: Drilling and Blasting Operations, HubLine Project, Captain of the Port, Boston, MA

AGENCY: Coast Guard, (DOT).

ACTION: Temporary final rule; request for comments; correction.

SUMMARY: This document corrects the temporary final rule; request for comments published in the **Federal Register** on December 9, 2002, creating temporary safety and security zones around the Drillboat No. 8 and Lablift IV to protect the public from hazards associated with drilling and blasting operations and to protect the vessels and the public from possible acts of terrorism. Due to heavy weather conditions and better information as to the makeup of the ocean floor in the area, contractors with the Hubline Gas Pipeline Project decided to replace the vessels Drillboat No. 8 and Lablift IV with one vessel, the lift barge Kaitlyn Eymard. This correction amends the temporary final rule to reflect the change of vessels that the security and safety zones are established to protect.

DATES: The temporary final rule published in the **Federal Register** is effective from November 18, 2002 through February 28, 2003. These corrections to that rule are effective December 24, 2002.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary final rule; request for comments; correction, contact Chief Petty Officer Daniel Dugery, Marine Safety Office Boston, Waterways Safety and Response Division, at (617) 223-3000.

SUPPLEMENTARY INFORMATION:

Background and Purpose

The Coast Guard published a temporary final rule; request for comments in the **Federal Register** on December 9, 2002 (67 FR 72840). This rule added temporary section 165.T01-131 to part 165 of Title 33 Code of

Federal Regulations creating temporary safety and security zones around the Drillboat No. 8 and the Lablift IV from November 18, 2002 through February 28, 2003.

Need for Correction

As published, the vessels named in the temporary final rule have been changed. Due to heavy weather conditions and better information as to the makeup of the ocean floor in the area, contractors with the Hubline Gas Pipeline Project determined that use of a single vessel, the lift barge Kaitlyn Eymard, would be safer and more effective than using two vessels, Drillboat No. 8 and Lablift IV, as currently identified in the temporary final rule. This rule removes the Drillboat No. 8 and the Lablift IV and replaces it with the lift barge Kaitlyn Eymard.

Clean Air Act Interim Approval of the Alternate Permit Program; Territory of Guam

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The EPA is taking direct final action to grant interim approval of the alternate permit program submitted by the Territory of Guam (Guam). In EPA's November 13, 1996 direct final rule, EPA granted Guam, as well as owners and operators of certain sources within Guam, an exemption from Title V requirements on the condition that Guam promulgate and administer an approved alternative permit program. EPA granted these conditional exemptions under the authority of section 325 of the Clean Air Act (Act). Interim approval of Guam's alternate permit program will allow sources to be permitted under an approved alternate permit program while also requiring Guam to make additional submissions to fulfill all of the requirements of the conditional exemption.
