

Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

We considered the environmental impact of this proposed rule and concluded that, under figure 2-1, paragraph (32)(e), of Commandant Instruction M16475.1d, this proposed rule is categorically excluded from further environmental documentation because promulgation of drawbridge regulations have been found not to have a significant effect on the environment. A written "Categorical Exclusion Determination" is not required for this rule.
