program have been delegated to the Federal Railroad Administration.

Funding: The Transportation, Treasury, and Independent Agencies Appropriations Act, 2004 provides \$4,970,000 and directs FRA to award one or more grants to demonstrate Compliant DMU vehicles. It is anticipated that the available funding will support one or two demonstrations. If two grants are awarded, FRA may choose not to award the grants in equal amounts. Additional funding for this or related work may be available in subsequent fiscal years.

Schedule for Demonstration Program: As directed by the Congress, FRA anticipates beginning demonstration in calendar 2004. It is anticipated that evaluation of the demonstration operation will continue for up to two years beyond the initial funding year. FRA anticipates that the eligible participant(s) will, where necessary, contract or otherwise enter into partnerships with developers and manufacturers of Compliant DMUs to accomplish the demonstration.

Eligible Participants: Any United States public transportation agency or combination of such agencies is eligible to apply for funding under this Notice. For state applicants, if the proposed demonstration territory is in more than one state, a single state agency should apply on behalf of all of the participating states.

Eligible Technology Demonstrations: Eligible projects must demonstrate a Compliant DMU vehicle in daily revenue passenger service beginning during calendar year 2004.

Requirements for Statements of Interest: The following points describe minimum content which will be required in Statements of Interest. Each Statement of Interest will:

1. Describe the proposed demonstration in detail, including the location and transportation service to be provided, the anticipated start date and duration of the demonstration, anticipated schedules, passenger service facilities to be employed, anticipated passenger utilization of the demonstration service, and how necessary maintenance and support operations will be conducted. Describe the scope of the demonstration proposed with Federal funding in the amount of \$4,970,500 and with Federal funding in the amount of \$2,485,250. Note that FRA may choose to award grants for any amount up to and including \$4,970,500.

2. Describe the types of DMU technology that the public agency is considering and how the Compliant DMU used in the proposed demonstration will be selected.

3. Describe the rail line on which the proposed demonstration will be conducted, including any discussions the public agency has had with the owner of the rail line in connection with the proposed demonstration.

4. Describe the traffic types (including ownership of trains), volumes, and speeds presently involved in operation on the demonstration track segment(s), the planned Compliant DMU demonstration service volumes and speeds, and the estimated potential corridor service volumes and speeds.

5. Specify the quantities and ownerships of operating vehicles anticipated to be utilized to accomplish the demonstration.

6. Show how the demonstration system initially will operate in relation to existing service, both passenger and freight.

7. Show the estimated total cost and time for accomplishing each task for implementing the demonstration, including estimates broken out, at a minimum, into the following categories: demonstration planning and installation, Compliant DMU equipment acquisition, and operating and maintenance schedules and costs. Specify sources of proposed funding, clearly indicating sources for the required non-Federal dollar-for-dollar cash match.

8. Specify which organizations will supply and install key components of the demonstration system and, to the extent available, provide letters of commitment supporting the proposed activities, schedules, and non-Federal cost sharing. Letters of support from the railroad whose tracks and facilities are to be used for the demonstration should be included.

9. Discuss the systematic operational recording, monitoring, analysis, and reporting procedures to be followed during the demonstration.

10. Discuss plans for training and familiarization of operating and maintenance personnel for the demonstration system.

Format: Statements of Interest may not exceed twenty-five pages in length.

Selection Criteria: The following will be considered to be positive selection factors in evaluating Statements of Interest for this demonstration:

1. The timeliness of the initiation of the demonstration and the availability of the Compliant DMU technology to be demonstrated. Applicants must be able to begin revenue service during calendar year 2004.

2. The extent to which the demonstration will assist in

understanding the state-of-the-art in Compliant DMU technology in areas of desired advancement, including safety, reliability, efficiency, operational flexibility, maintainability, capital costs and/or operating costs of the corridor operation, as a whole, as well as of the Compliant DMU equipment itself.

3. The extent to which the demonstration will involve an innovative Compliant DMU technology available for commercial development, as opposed to modification of equipment previously in service but currently not produced.

4. The technological risk associated with successfully demonstrating Compliant DMU technology on the schedule proposed.

5. The compliance of the technology with other Federal requirements, including the Americans with Disabilities Act and relevant diesel emission standards of the U.S. Environmental Protection Agency.

6. The contribution the demonstration might have to the development or expansion of the domestic passenger rail car manufacturing industry.

7. The extent to which the demonstration will have ongoing transportation benefits after the end of the scheduled demonstration.

8. The ability of the Compliant DMU technology to be readily and economically expanded to respond to increased speed, volume, and complexity of traffic.

9. The extent of non-Federal contributions to the demonstration.

Issued in Washington, DC, on March 1, 2004.
