

4:30 p.m., Monday through Friday, excluding legal holidays. The EPA Docket Center Reading Room telephone number is (202) 566-1744 and the telephone number for the OPPT Docket, which is located in EPA Docket Center, is (202) 566-0280.

2. **Electronic access.** You may access this **Federal Register** document electronically through the EPA Internet under the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>. The revised TSCA CBI Protection Manual is available for the public to view at the EPA Docket Center (Room B102), EPA West Building, 1301 Constitution Avenue, NW, Washington, DC 20460

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at <http://www.epa.gov/edocket/> to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. Once in the system, select "search," then key in the appropriate docket ID number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket.

Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

II. What Action is the Agency Taking?

EPA is issuing this notice to announce the availability of the revised TSCA security manual for Federal employees and contractors. The revised TSCA CBI

Protection Manual supersedes the previous edition of the TSCA Confidential Business Information Security Manual (April 1995). The revised manual includes changes and refinements in existing procedures developed since the publication of the previous manual. Several changes to the manual have been made as a result of EPA's continuing efforts to improve the procedures for handling TSCA CBI. None of these changes reduce the overall level of protection afforded TSCA CBI. Changes and clarifications include the following examples: (1) Updated and detailed rules for working with TSCA CBI on computers, including use of the EPA TSCA CBI secure local area network; (2) clarification that, notwithstanding supplemental administrative access requirements, legal access to TSCA CBI is conferred to Federal employees with a job-related need under Section 14 of TSCA; (3) clause in the Preface providing the Director of the Information Management Division, OPPT, with the authority to grant exceptions to prescribed procedures in the Manual in justified "extraordinary circumstances;" (4) expansion of the working papers exemption to TSCA CBI Document Control Officer (DCO) recordkeeping from only allowing an author/creator exclusive physical possession of their personal papers, to allowing them to be under the author/creator's control while in the temporary physical possession of another TSCA CBI authorized person; (5) clarifying the authority of the OPPT DCO to delegate TSCA CBI mailouts and receipts to other DCOs at EPA Headquarters; (6) detailed guidelines incorporating mandatory criteria for working with TSCA CBI in a personal residence; (7) change from annual audits required for contractor DCOs, to contractor and Federal baseline comprehensive audits followed by quadrennial comprehensive audits and annual transaction audits; and (8) for new-access contractor employees, replacement of Minimum Background Investigation (MBI) with National Agency Check and Inquiry (NACI) investigation. The Agency's policy on revisions to TSCA CBI security manuals was announced in the **Federal Register** of November 14, 1985 (50 FR 47108). EPA is publishing this notice in accordance with the requirements of that policy. EPA is printing and distributing copies of the revised manual to affected EPA offices. The provisions of the revised manual were effective January 28, 2004.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-7648-1]

Connecticut Marine Sanitation Device Standard; Receipt of Petition

Notice is hereby given that a petition has been received from the State of Connecticut requesting a determination of the Regional Administrator, U. S. Environmental Protection Agency, pursuant to section 312(f)(3) of Public Law 92-500 as amended by Public Law 95-217 and Public Law 100-4, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the area between Wamphassuc Point and Eastern Point, including portions of Fishers Island Sound, Pine Island Bay, Baker Cove, Mumford Cove, West Cove, Mystic Harbor, Mystic River, Quiambog Cove, lower portions of the Poquonnock River and lower portions of Palmer Cove in the State of Connecticut, to qualify as a "No Discharge Area" (NDA). The area covered under this petition extends from Eastern Point, Groton at (41°19'08.94" N by 72°04'31.09" W) due south to the boundary between Connecticut and New York at (41°15'54.55" N by 72°04'31.09" W), then northeasterly following the boundary between Connecticut and New York to (41°17'26.34" N by 72°01'10.94" W) then continuing northeasterly following the boundary between Connecticut and New York to (41°18'37.84" N by 71°55'47.63" W) then south east following the boundary between Connecticut and New York to a point due south of Wamphassuc Point at (41°18'28.99" N by 71°55'15.75" W), then due north past Noyes shoal to Wamphassuc Point (41°19'40.63" N by 71°55'15.75" W).

The State of Connecticut has certified that there are 13 pumpout units at 11 facilities located in Mystic, Noank, and Groton to service vessels within the proposed NDA. A list of the facilities, phone numbers, locations, and hours of operation is appended at the end of this petition. Of the 13 current facilities, nine are fixed shore-based facilities, two

are mobile carts, one is a mobile trailer mounted unit, and one is a mobile pumpout boat. Two facilities provide portable toilet holding tank dump stations. The majority of pumpout facilities discharge to town sewage systems, the carts and one other facility discharge into storage tanks which a licensed seepage hauler services. In addition, the majority of marinas provide public restrooms for boaters and other clientele.

The State of Connecticut used three different methods to estimate vessel population in the proposed NDA, and used the highest estimate of 3700 in their calculations to determine the number of pumpout facilities needed to adequately serve the boating public. The transient vessel population is estimated to be 200 at any point in time during the

boating season, which is included in the total figure. Of the estimated total of 3700 vessels using this area at any given time, approximately 1300 are of a size that may have sewage holding tanks and need pumpout services. The State has determined that the 13 pumpout facilities currently in service in the proposed NDA are sufficient to meet the potential demand and prevent the discharge of vessel sewage into coastal waters.

The coastline and coastal waters within the proposed NDA contain a variety of rich natural habitats and support a wide diversity of species, providing a range of recreational and commercial activities. There are 25 public beaches, 11 public boat ramps, and 4 parks or wildlife management areas within the proposed NDA. Both

recreational and commercial shell fishermen use the area for the harvest of hard clams, some oysters, and soft shell clams. In addition, fishing is commonplace and the species found in the area are smelt, small cod, flounder, scup, menhaden, and white perch.

Comments and reviews regarding this request for action may be filed on or before June 1, 2004. Such communications, or requests for information or a copy of the applicant's petition, should be addressed to Ann Rodney, U. S. Environmental Protection Agency—New England Region, One Congress Street, Suite 1100, CWQ, Boston, MA 02114–2023. Telephone: (617) 918–1538.

Dated: April 6, 2004.

Robert W. Varney,
Regional Administrator, Region 1.
