**President's Export Council Subcommittee on Export Administration; Notice of Recruitment of Private-Sector Members**

**SUMMARY:** The President's Export Council Subcommittee on Export Administration (PECSEA) advises the U.S. Government on matters and issues pertinent to implementation of the provisions of the Export Administration Act and the Export Administration Regulations, as amended, and related statutes and regulations. These issues relate to U.S. export controls as mandated by law for national security, foreign policy, non-proliferation, and short supply reasons. The PECSEA draws on the expertise of its members to provide advice and make recommendations on ways to minimize the possible adverse impact export controls may have on U.S. industry. The PECSEA provides the Government with direct input from representatives of the broad range of industries that are directly affected by export controls.

The PECSEA is composed of high-level industry and Government members representing diverse points of view on the concerns of the business community. PECSEA industry representatives are selected from firms producing a broad range of goods, software, and technologies presently controlled for national security, foreign policy, non-proliferation, and short supply reasons or that are proposed for such controls, balanced to the extent possible among large and small firms.

PECSEA members are appointed by the Secretary of Commerce and serve at the Secretary's discretion. The membership reflects the Department's commitment to attaining balance and diversity. PECSEA members must obtain secret-level clearances prior to appointment. These clearances are necessary so that members can be permitted access to relevant classified

information needed in formulating recommendations to the President and the U.S. Government. The PECSEA meets 4 to 6 times per year. Members of the Subcommittee will not be compensated for their services. The PECSEA is seeking private-sector members with senior export control expertise and direct experience in one or more of the following industries: machine tools, semiconductors, commercial communication satellites, high performance computers, telecommunications, aircraft, pharmaceuticals, and chemicals.

[Docket No. 040610178-4178-01]

#### National Defense Stockpile Market Impact Committee Request for Public Comments on the Potential Market Impact of Proposed Stockpile Disposals in the FY 2005 Annual Materials Plan (AMP)

**AGENCY:** U.S. Department of Commerce.

**ACTION:** Notice of inquiry.

**SUMMARY:** This notice is to advise the public that the National Defense Stockpile Market Impact Committee (co-chaired by the Departments of Commerce and State) is seeking public comments on the potential market impact of proposed increases to the disposal levels of excess materials from the National Defense Stockpile for the Fiscal Year 2005 Annual Materials Plan.

**DATES:** Comments must be received by July 26, 2004.

**ADDRESSES:** Written comments should be sent to William J. Denk, Co-Chair, Stockpile Market Impact Committee, Office of Strategic Industries and Economic Security, Room 3876, Bureau of Industry and Security, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; Fax: (202) 482-5650; E-mail: [wdenk@bis.doc.gov](mailto:wdenk@bis.doc.gov).

**FOR FURTHER INFORMATION CONTACT:** The co-chairs of the National Defense Stockpile Market Impact Committee. Contact either William J. Denk, Office of Strategic Industries and Economic Security, Bureau of Industry and Security, U.S. Department of Commerce, (202) 482-3634 or James Steele, Office of International Energy and Commodity Policy, U.S. Department of State, (202) 647-2871.

**SUPPLEMENTARY INFORMATION:** Under the authority of the Strategic and Critical Materials Stock Piling Act of 1979, as amended, (50 U.S.C. 98 *et seq.*), the Department of Defense ("DOD"), as National Defense Stockpile Manager, maintains a stockpile of strategic and critical materials to supply the military, industrial, and essential civilian needs of the United States for national defense. Section 3314 of the Fiscal Year ("FY") 1993 National Defense Authorization Act ("NDAA") (50 U.S.C. 98h-1) formally established a Market Impact Committee ("the Committee") to "advise the National Defense Stockpile Manager on the projected domestic and foreign economic effects of all acquisitions and disposals of materials from the stockpile \* \* \*". The Committee must also balance market impact concerns with the statutory requirement to protect the Government against avoidable loss.

The Committee is comprised of representatives from the Departments of Commerce, State, Agriculture, Defense, Energy, Interior, Treasury, and the Federal Emergency Management Agency, and is co-chaired by the Departments of Commerce and State. The FY 1993 NDAA directs the Committee to "consult from time to time with representatives of producers, processors and consumers of the types of materials stored in the stockpile."

The National Defense Stockpile Administrator is proposing revisions to the previously approved FY 2005 Annual Materials Plan ("AMP") quantities for three materials: (1) Ferromanganese, from 50,000 Short Tons to 100,000 Short Tons; (2) Manganese ore (Metallurgical grade), from 250,000 Short Dry Tons to 500,000 Short Dry Tons, and (3) Tungsten ores and Concentrates, from 4,000,000 Pounds to 5,000,000 Pounds (contained tungsten). Significant supply shortfalls in global and domestic markets, at this time, necessitate an additional increase in the allotment of these materials for the FY 2005 AMP. The Committee is seeking public comments on the potential market impact of an increase to the previously approved material quantities to be offered for sale in the

FY 2005 AMP. Note: The proposed revisions must first be approved by the U.S. Congress.

The AMP quantities are not targets for either sale or disposal. They are only a statement of the proposed maximum disposal quantity of each listed material that may be sold in a particular fiscal year. The quantity of each material that will actually be offered for sale will depend on the market for the material at the time of the offering as well as on the quantity of each material approved for disposal by Congress.

The Committee requests that interested parties provide written comments, supporting data and documentation, and any other relevant information on the potential market impact of the sale of these AMP commodities. Although comments in response to this Notice must be received by July 26, 2004, to ensure full consideration by the Committee, interested parties are encouraged to submit comments and supporting information at any time thereafter to keep the Committee informed as to the market impact of the sale of these commodities. Public comments are an important element of the Committee's market impact review process.

Public comments received will be made available at the Department of Commerce for public inspection and copying. Anyone submitting business confidential information should clearly identify the business confidential portion of the submission and also provide a non-confidential submission that can be placed in the public file. The Committee will seek to protect such information to the extent permitted by law.

The records related to this Notice will be made accessible in accordance with the regulations published in Part 4 of Title 15 of the Code of Federal Regulations (15 CFR 4.1 *et seq.*). Specifically, the Bureau of Industry and Security's Freedom of Information Act ("FOIA") reading room is located on its Web page, which can be found at <http://www.bis.doc.gov>, and copies of the public comments received will be maintained at that location (see FOIA heading). If requesters cannot access the Web site, they may call (202) 482-2165 for assistance.

Dated: June 17, 2004.
