

OMB review and the requirements of the Executive Order. The Order defines the term "regulatory action" to include any substantive action by an agency (normally published in the **Federal Register**) that is expected to lead to the promulgation of a final rule or regulation. While EPA does not normally publish plans and priority-setting documents such as this 2004 Plan in the **Federal Register**, EPA is required by statute to do so here. The Order also defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order."

Pursuant to the terms of Executive Order 12866, it has been determined that this notice constitutes a "significant regulatory action" within the meaning of the Executive Order. EPA has thus submitted this notice to OMB for review. Changes made in response to OMB suggestions or recommendations will be documented in the public record.
