Title: National Wastewater Operator Training and Technical Assistance Program—CWA 104(g)(1) (Renewal).

Abstract: The Wastewater Operator Training Program provides on-site technical assistance to municipal wastewater treatment plants. Information will be collected from the network of forty-six 104(g)(1) training centers set up through out the United States. The information will be collected to identify the facilities assisted, the different types of assistance the program provides and the environmental outcomes and benefits of the assistance provided by the program. The information will be collected and submitted on either an annual or semi-annual basis. A Microsoft Access database and a Lotus 1-2-3 spreadsheet have been developed for this purpose. This ICR will be used by EPA for the technical and financial management of the 104(g)(1) Program. It is strongly suggested that the 104(g)(1) Program training centers participate in the information collection although it is not mandatory. All information in the data system will be made public upon request.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for

this collection of information is estimated to average 7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State and local governments, State and county colleges, and those organizations which provide training assistance through the Clean Water Act 104(g)(1) Program to municipal wastewater treatment plants.

Estimated Number of Respondents: 46.

Frequency of Response: Annually and biannually.

Estimated Total Annual Hour Burden: 322.

Estimated Total Annual Cost: \$13,000, includes \$0 annualized capital/startup costs, \$0 annual O&M costs and \$13,000 annual labor costs.

Changes in the Estimates: There is a decrease of 14 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to the reduction of the number of respondents from forty-eight (48) to forty-six (46). There is an increase of \$6,000 in the total estimated cost burden. This increase is due to the increase of the average salary of those involved in reporting.

Dated: September 9, 2004.

Oscar Morales,

Director, Collection Strategies Division.
