

Inspection Service (APHIS). On March 10, 2004, CDC lifted the embargo of birds and bird products from Hong Kong Special Administrative Region because of the documented public health and animal health measures taken by Hong Kong officials to prevent spread of the outbreak within Hong Kong and the absence of avian influenza cases in Hong Kong's domestic and wild bird populations. APHIS took a similar action. CDC and APHIS are now imposing an embargo on birds and bird products from Malaysia because of the documented cases of Influenza A (H5N1) in poultry in Malaysia. All other portions of the February 4, 2004, order and March 10, 2004, amendment remain in effect until further notice.

**DATES:** This action is effective on September 28, 2004 and will remain in effect until further notice.

**SUPPLEMENTARY INFORMATION:**

**Background**

On August 19, 2004, the Office of International Epizootics (OIE), an international organization that reports the occurrence of animal diseases detected worldwide, listed Malaysia among the countries in which an outbreak of avian influenza was occurring. According to the OIE emergency report, there was a laboratory-confirmed report of H5N1 influenza virus on one farm in Malaysia at Kelantan State, Tumpat district, Pasir Pekan village. The initial flock of village chickens consisted of 60 birds of mixed ages, reared free range. Within a 1-km radius of the affected flock there are another 103 village chickens, 62 birds of mixed species and 8 ducks (173 birds total). On September 9, 2004, OIE reported a second laboratory-confirmed occurrence of H5N1 influenza in a flock of birds located in an area 5 kilometers from the previously infected flock. The susceptible avian population within the village included 1,608 chickens, 68 bantam chickens, 4 turkeys, 93 ducks, 9 geese, 60 quail, and 193 other species (2,035 birds total).

The government of Malaysia has instituted a number of control measures, including depopulation of poultry and birds within a one-kilometer radius of the infective flock; quarantine and clinical surveillance within a 10-kilometer radius of the infected flock; and restrictions on the movement of

birds and their products to other states within Malaysia.

Introduction of influenza A (H5N1)-infected birds into the United States could lead to outbreaks of disease in the human population, a significant public health threat. Banning the importation of all avian species from affected countries, including Malaysia, is an effective means of limiting this threat. CDC is therefore taking this action to reduce the chance of introduction or spread of influenza A (H5N1).

**Immediate Action**

Therefore, pursuant to 42 CFR 71.32(b), the February 4, 2004, order is amended to add Malaysia to the list of countries subject to that order's embargo of birds and products derived from birds (including hatching eggs). All other portions of the February 4, 2004 order (69 FR 7165, Feb. 13, 2004) and the March 10, 2004 amendment (69 FR 12975, Mar. 19, 2004) shall remain in effect until further notice.

**Federal Motor Vehicle Safety Standards; Child Restraint Systems; Correction**

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Correcting amendments.

**SUMMARY:** This document corrects a final rule (Docket NHTSA-03-15351) that was published Tuesday, June 24, 2003 (68 FR 37620). The rule updated test procedures in Federal Motor Vehicle Safety Standard (FMVSS) No. 213, "Child Restraint Systems," and expanded the standard to restraints for children weighing up to 65 pounds.

**DATES:** Effective October 4, 2004.

**FOR FURTHER INFORMATION CONTACT:** Deirdre Fujita, Office of the Chief Counsel, NHTSA, telephone 202-366-2992; fax 202-366-3820, 400 Seventh St., SW., Washington, DC 20590.

**SUPPLEMENTARY INFORMATION:** The final rule that is the subject of this correction amended Federal Motor Vehicle Safety Standard No. 213, *Child Restraint Systems* (49 CFR 571.213) to update the procedures used to test child restraint systems.

**Need for Correction**

As published, the final rule contains two minor errors that the agency wants to correct to ensure the clarity of the standard. First, there are two paragraphs designed (ii) in S6.1.1(a)(1). The first such paragraph should be changed to (i). Second, paragraph (e) of S7.1.1 should be removed. S7.1.1 sets forth requirements that apply to child restraints manufactured before August 1, 2005. Paragraph (e) relates to child restraints manufactured on or after August 1, 2005 and thus does not belong in S7.1.1.

(a) *Test devices.*

(1) Add-on child restraints.

(i) The test device for add-on restraint systems manufactured before August 1, 2005 is a standard seat assembly consisting of a simulated vehicle bench seat, with three seating positions, which is described in Drawing Package SAS-100-1000 with Addendum A: Seat Base Weldment (consisting of drawings and a bill of materials), dated October 23, 1998 (incorporated by reference in § 571.5). The assembly is mounted on a dynamic test platform so that the center SORL of the seat is parallel to the direction of the test platform travel and so that movement between the base of the assembly and the platform is prevented.

(ii) The test device for add-on restraint systems manufactured on or after August 1, 2005 is a standard seat assembly consisting of a simulated vehicle bench seat, with three seating positions, which is depicted in Drawing Package, "NHTSA Standard Seat Assembly; FMVSS No. 213, No. NHTSA-213-2003," (consisting of drawings and a bill of materials) dated June 3, 2003 (incorporated by reference; see § 571.5).
