

under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

#### Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

#### Environment

We have analyzed this proposed rule under Commandant Instruction M16475.ID, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction, from further environmental documentation because we are establishing a security zone.

A draft “Environmental Analysis Check List” and a draft “Categorical Exclusion Determination” (CED) are available in the docket where indicated under **ADDRESSES**. Comments on this section will be considered before we make the final decision on whether to categorically exclude this rule from further environmental review.

#### Approval and Promulgation of Implementation Plans Georgia: Approval of Revisions to the Georgia State Implementation Plan

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The EPA is proposing to approve the State Implementation Plan (SIP) revisions submitted by the State of Georgia, through the Georgia Environmental Protection Division (GAEPD), on March 15, 2005. These revisions pertain to Georgia’s rules for Air Quality Control and were the subject of a public hearing held on March 18, 2004, and adopted by the Board of Natural Resources on April 28, 2004. The revisions became effective in the State on July 8, 2004. On September 26, 2003, EPA published a final rule in the **Federal Register** (see 68 FR 55469) reclassifying the Atlanta 1-hour ozone nonattainment area from serious to severe. These revisions satisfy the additional requirements for severe 1-hour ozone nonattainment areas. In the Final Rules section of this **Federal Register**, EPA is approving the State’s SIP revision as a direct final rule without prior proposal because the Agency views this as noncontroversial and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no significant, material, and adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments

received will be addressed in a subsequent final rule based on this rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

**DATES:** Written comments must be received on or before June 8, 2005.

**ADDRESSES:** Comments may be submitted by mail to: Scott M. Martin, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303-8960. Comments may also be submitted electronically, or through hand delivery/courier. Please follow the detailed instructions described in the direct final rule, **ADDRESSES** section which is published in the Rules Section of this **Federal Register**.

**AGENCY:** Environmental Protection Agency (EPA).

excess emissions during startup, shutdown, and malfunction (SSM) activities. The action will have the effect of extending the expiration date of certain provisions from June 30, 2005 to no later than June 30, 2006. Texas is making this change to allow for additional time before these provisions expire from the SIP to submit a revised excess emissions rule for our approval into the SIP.
