The general area of the Joint Venture's planned activity is to provide a virtually unlimited commercial supply of solar-grade silicon at unprecedented low prices in a time frame of three years. This new source of silicon will serve as a feedstock for the large-scale manufacture of photovoltaic solar cells. The goal is to deliver silicon supply for the PV industry with a substantial cost reduction versus semiconductor-grade silicon by utilizing metallurgical processes that will purify the cheap raw silicon presently made for the steel, aluminum, and silicone polymer industries. The activities of the Joint Venture project will be partially funded by an award from the Advanced Technology Program, National Institute of Standards and Technology, U.S. Department of Commerce.
