POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

AIDMS electronic records are temporarily stored in systems (including, but not limited to, electronic readers, databases, servers, workstations, and message queues) at land border POEs and at principally stored at the primary AIDMS records database at the DHS Data Center in Ashburn, Virginia.

RETRIEVABILITY:

Information may be searched and retrieved based on various data elements, including, but not limited to: RFID tag number, traveler identification number, transaction number, and name of covered individual.

SAFEGUARDS:

Information in this system is safeguarded in accordance with applicable laws and policies, including the DHS Information Technology Security Program Handbook. All records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include restricting access to authorized personnel who have a need-to-know, using locks, and password protection identification features. The system is also protected through a multi-layer security approach. The protective strategies are physical, technical, administrative and environmental in nature and provide access control to sensitive data, physical access control to DHS facilities, confidentiality of communications, authentication of sending parties, and personnel screening to ensure that all personnel with access to data are screened through background investigations commensurate with the level of access required to perform their duties.

RETENTION AND DISPOSAL:

The information that resides in the AIDMS is temporary and is retained only as long as needed to process a covered individual's land border crossing and to transfer the crossing information to existing DHS systems. US-VISIT is working with the U.S. National Archives and Records Administration (NARA) to develop a retention schedule.

SYSTEM MANAGER(S) AND ADDRESS:

Program Manager, AIDMS Program Management Office, US-VISIT Program, Border and Transportation Security, U.S. Department of Homeland Security, Washington, DC 20528, USA.

NOTIFICATION PROCEDURES:

The records in this system come directly from the RFID tag embedded in the I-94 Arrival/Departure forms, information located in the TECS database maintained by CBP, and information captured directly from the covered individual. Each RFID tag will use a unique ID number embedded in the tag to associate the I-94 holders with the tag. After the tag-enabled I-94 is issued to an individual, the ID number will be used as a pointer to the individual's biographic information located in the TECS database. When the individual passes through the entry and exit lanes of a POE, the ID number will be read and used to retrieve the individual's immigration information for use in the entry and exit inspection processes by CBP officers.
