SUPPLEMENTARY INFORMATION:

Title: Cooperative State Research, Education, and Extension Service

Application Kit for Research and Extension Programs.

OMB Number: 0524–0039. Expiration Date of Current Approval: March 31, 2006.

Type of Request: Revise a currently approved information collection.

Abstract: The Cooperative State Research, Education, and Extension Service (CSREES) sponsors ongoing agricultural research, extension, and education programs under which competitive, special, and other awards of a high-priority nature are made. Before awards can be made, certain information is required from applicants as part of an overall proposal package. In addition to project summaries, descriptions of the research, extension, or education efforts; literature reviews; curricula vitae of project directors; other, relevant technical aspects of the proposed project; and supporting documentation of an administrative and budgetary nature also must be provided.

Because of the nature of the competitive, peer-reviewed process, it is important that information from applicants be available in a standardized format to ensure equitable treatment. Each year, solicitations are issued requesting proposals for various research, education, and extension areas targeted for support. Applicants submit proposals for these targeted areas following formats outlined in the proposal application guidelines accompanying each program's solicitation. These proposals are evaluated by peer review panels and awarded on a competitive basis. The forms and narrative information are mainly used for proposal evaluation and administration purposes. While some of the information is used to respond to inquiries from Congress and other government agencies, the forms are not designed to be statistical surveys or data collection instruments. Their completion by potential recipients is a normal part of the application to agencies which support basic and applied science.

In FY 2004, CSREES initiated the receipt of applications electronically through the Grants.gov (http:// www.grants.gov) storefront for limited programs. CSREES expects to utilize the SF-424(R&R) Application for Federal Assistance data set and forms package (see 69 FR 53923) along with CSREES Agency-specific forms to receive applications electronically. The CSREES Agency-specific forms have been deployed; and, after additional operational testing of the forms and their instructions, CSREES will again make available the option to submit applications electronically to CSREES

through Grants.gov. As CSREES transitions to use of the SF–424(R&R), there remains a need for the currently approved information collection entitled, "Cooperative State Research, Education and Extension Service Application Kit for Research and Extension Programs."

The following information is collected in the "Cooperative State Research, Education and Extension Service Application Kit for Research and
