SUPPLEMENTARY INFORMATION: A Notice of Intent to prepare a draft EIS was published May 11, 2004. A Draft EIS/EIR (050103) was circulated in early 2005. The comment period for that document closed on May 2, 2005. Modifications made to the project, since that time, are the subject of this SDEIS/EIR. The proposed action is the development of a large parcel business park through the acquisition of land and the construction of major infrastructure components and the provision of public services and utilities to serve the development. The City of Redding is proposing the development of the area east and northeast of the Municipal Airport in Redding, California. The proposed action study area is located on the Enterprise and Cottonwood, California 7.5-minute USGS quadrangles, Township 31 North, Range 4 West, Sections 2, 3, 10, 14, 15, 22, 23, 26, 34, and 35. The purpose and need for this project is to increase the activity of contributory economic sectors by constructing a medium to large parcel business park within the City of Redding sphere of influence capable of attracting and accommodating diverse business and industrial users.

The SDEIS/EIR focuses on additional information in the purpose and need discussion, and Alternatives 2 and 3. Tables, figures, and pertinent text discussions have been updated as necessary. The changes in the alternatives analysis focus on the following:

Alternative 2: (Preferred Alternative): Significant changes since the DEIS include a reduction in the developable acreage from 383 acres to approximately 340 acres. The set-aside and open space area increased from approximately 250 acres to approximately 290 acres. All development was eliminated from the watershed that feeds the adjacent Stillwater Plains. Easements will

prevent infrastructure expansion to the north or east of the project's immediate boundaries. Additional buffers were added to protect sensitive areas.

Alternative 3: The SDEIS includes updated information on endangered species not available at the release of the earlier DEIS.

The SDEIS/SDEIR addresses the following environmental issues: hydrology, biological resources, erosion control, growth inducing effects, and secondary and cumulative impacts.
