

amend its regulations governing the disposal of high-level radioactive wastes in a proposed geologic repository at Yucca Mountain, Nevada. The proposed rule would implement the U.S. Environmental Protection Agency's (EPA's) proposed standards for doses that could occur after 10,000 years but within the period of geologic stability. The comment period for EPA's proposed standards currently expires on November 21, 2005 (extended 30 days from October 21, 2005); the comment period for NRC's proposed rule currently expires on November 7, 2005.

A letter was received from U.S. Senators Harry Reid and John Ensign from the State of Nevada requesting that the comment period for NRC's proposed rule be extended to a total of 180 days, or at least past the date of EPA's 30-day extension. Another letter representing several citizen and environmental groups requested that the deadline for comments be extended to 180 days. In addition, a letter from the Agency for Nuclear Projects, on behalf of the State of Nevada, requested that NRC extend its comment period for an additional 30 days, consistent with EPA's 30-day extension of its comment period.

Given the interrelationship between these two proposed rules, and for consistency with the ongoing EPA rulemaking process, NRC has decided to extend the comment period for its rulemaking an additional 30 days to December 7, 2005, for a total comment period of 90 days. In vacating the compliance period in NRC's rule at 10 CFR part 63, the United States Court of Appeals for the District of Columbia Circuit has made clear that it is "NRC's obligation under the [Energy Policy Act of 1992] to maintain licensing criteria that are consistent with the public health and safety standards promulgated by EPA." See *Nuclear Energy Institute, Inc. v. EPA*, 373 F.3d 1251, 1299 (D.C. Cir. 2004). Thus NRC's proposed rule, for the most part, simply implements EPA's proposed standards for doses that could occur after 10,000 years but within the period of geologic stability, and its final rule will need to implement any changes EPA may make with respect to its standards. NRC's proposed rule provides further detail for implementing the EPA standard in only two specific areas: A value to represent climate change after 10,000 years; and a requirement that calculations of radiation doses for workers use the same weighting factors that EPA is proposing for calculating individual doses to members of the public. A lengthy period of time should not be needed by potential commenters to address these

issues. Hence the NRC's 30-day extension is believed to be appropriate.

DATES: The comment period has been extended and now expires on December 7, 2005. Comments received after this date will be considered if it is practical to do so, but NRC is able to assure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any one of the following methods. Please include the following number (RIN 3150-AH68) in the subject line of your comments. Comments on rulemakings submitted in writing or in electronic form will be made available to the public in their entirety on the NRC rulemaking Web site. Personal information will not be removed from your comments.

Mail comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attn: Rulemakings and Adjudications Staff.

E-mail comments to: SECY@nrc.gov. If you do not receive a reply e-mail confirming that we have received your comments, contact us directly at (301) 415-1966. You may also submit comments via the NRC's rulemaking Web site at <http://ruleforum.llnl.gov>. Address questions about our rulemaking Web site to Carol Gallagher (301) 415-5905; e-mail cag@nrc.gov. Comments can also be submitted via the Federal eRulemaking Portal at <http://www.regulations.gov>.

Hand deliver comments to: 11555 Rockville Pike, Rockville, Maryland 20852, between 7:30 a.m. and 4:15 p.m. Federal workdays. (Telephone (301) 415-1966.)

Fax comments to: Secretary, U.S. Nuclear Regulatory Commission at (301) 415-1101.

Publicly available documents related to this rulemaking may be examined and copied for a fee at the NRC's Public Document Room, Public File Area O1 F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland. Selected documents, including comments, can be viewed and downloaded electronically via the NRC rulemaking Web site at <http://ruleforum.llnl.gov>.

Publicly available documents created or received at the NRC after November 1, 1999, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/NRC/ADAMS/index.html>. From this site, the public can gain entry into the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are

problems in accessing the documents located in ADAMS, contact the NRC Public Document Room Reference staff at 1-800-397-4209, (301) 415-4737, or by e-mail to pdr@nrc.gov.

FOR FURTHER INFORMATION CONTACT: Timothy McCartin, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone (301) 415-7285, e-mail tjm3@nrc.gov; Janet Kotra, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone (301) 415-6674, e-mail jpk@nrc.gov; or Frank Cardile, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone (301) 415-6185, e-mail fpc@nrc.gov.

Dated at Rockville, Maryland, this 1st day of November, 2005.

For the Nuclear Regulatory Commission.

Luis A. Reyes,

Executive Director for Operations.

BILLING CODE 7590-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2005-22364; Directorate Identifier 2005-NE-26-AD]

RIN 2120-AA64

Airworthiness Directives; Turbomeca Arriel 1B, 1D and 1D1 Turboshift Engines

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for Turbomeca Arriel 1B, 1D and 1D1 turboshift engines. This proposed AD would require inspecting the 2nd stage nozzle guide vanes (NGV2) for wall thickness. This proposed AD results from one instance of a fractured 2nd stage turbine blade followed by an uncommanded engine shutdown. We are proposing this AD to detect and prevent perforation of the NGV2 that could cause fracture of a turbine blade that could result in an uncommanded engine in-flight shutdown.

DATES: We must receive any comments on this proposed AD by January 3, 2006.

ADDRESSES: Use one of the following addresses to comment on this proposed AD.

- DOT Docket Web site: Go to <http://dms.dot.gov> and follow the instructions for sending your comments electronically.

- Government-wide rulemaking Web site: Go to <http://www.regulations.gov> and follow the instructions for sending your comments electronically.

- Mail: Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-0001.

- Fax: (202) 493-2251.

- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Contact Turbomeca S.A., 40220 Tarnos, France; telephone 33 05 59 74 40 00, fax 33 05 59 74 45 15, for the service information identified in this proposed AD.

FOR FURTHER INFORMATION CONTACT: Christopher Spinney, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803-5299; telephone (781) 238-7175; fax (781) 238-7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send us any written relevant data, views, or arguments regarding this proposal. Send your comments to an address listed under **ADDRESSES**. Include "Docket No. FAA-2005-22364; Directorate Identifier 2005-NE-26-AD" in the subject line of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments received by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to <http://dms.dot.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of the DMS web site, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register**

published on April 11, 2000 (65 FR 19477-78) or you may visit <http://dms.dot.gov>.

Examining the AD Docket

You may examine the docket that contains the proposal, any comments received, and any final disposition in person at the Docket Management Facility Docket Offices between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone (800) 647-5227) is on the plaza level of the Department of Transportation Nassif Building at the street address stated in **ADDRESSES**. Comments will be available in the AD docket shortly after the docket office receives them.

Discussion

The Direction Generale de L'Aviation Civile (DGAC), which is the airworthiness authority for France, notified us that an unsafe condition might exist on certain Turbomeca S.A. Arriel 1B, 1D and 1D1 turboshaft engines. The affected engines are those modified to TU 202, except those having NGV2 vanes with serial numbers or specific marks identified in Turbomeca Mandatory Service Bulletin (MSB) No. 292 72 0231, Update No. 5, dated July 22, 2004. The DGAC advises that in order to detect and prevent a possible perforation of the NGV2, they are requiring inspection of the NGV2 for wall thickness. Perforation of the NGV2 could cause an aerodynamic wake upstream of the 2nd stage turbine. Such a wake could lead to the fracture of a 2nd stage turbine blade followed by an uncommanded engine in-flight shutdown. On a single-engine helicopter, this in-flight shutdown could lead to an emergency landing by autorotation or an accident.

Relevant Service Information

We have reviewed and approved the technical contents of Turbomeca MSB No. 292 72 0231, Update No. 5, dated July 22, 2004, that describes procedures for removing each vane of the NGV2, checking the vane thickness, and replacing the NGV2 if the vane thickness is below the defined criteria. The DGAC classified this MSB as mandatory and issued airworthiness directive No. F-2004-088 R1, dated August 4, 2004, in order to ensure the airworthiness of these NGV2 vanes in France.

FAA's Determination and Requirements of the Proposed AD

These engines, manufactured in France, are type-certificated for operation in the United States under the

provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. In keeping with this bilateral airworthiness agreement, the DGAC kept us informed of the situation described above. We have examined the DGAC's findings, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States. For this reason, we are proposing this AD, which would require inspection of the NGV2 wall thickness. The proposed AD would require you to use the service information described previously to perform these actions.

Costs of Compliance

There are about 2,000 Turbomeca Arriel 1B, 1D and 1D1 turboshaft engines of the affected design in the worldwide fleet. We estimate that this proposed AD would affect 571 engines installed on helicopters of U.S. registry. We also estimate that it would take about 0.5 work hours per engine to perform the proposed actions, and that the average labor rate is \$65 per work hour. No parts are required. Based on these figures, we estimate the total cost of the proposed AD to U.S. operators to be \$18,558.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
3. Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Under the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Turbomeca: Docket No. FAA-2005-22364; Directorate Identifier 2005-NE-26-AD.

Comments Due Date

(a) The Federal Aviation Administration (FAA) must receive comments on this airworthiness directive (AD) action by January 3, 2006.

Affected ADs

- (b) None.

Applicability

(c) This AD applies to Turbomeca Arriel 1B, 1D and 1D1 certain turboshaft engines, modified to TU 202. These engines are installed on, but not limited to, Eurocopter France AS350A, AS350B, AS350B1, and AS350B2 helicopters.

Unsafe Condition

(d) This AD results from one instance of a fractured 2nd stage turbine blade followed by an uncommanded engine shutdown. We are issuing this AD to detect and prevent perforation of the NGV2 that could cause fracture of a turbine blade that could result in an uncommanded engine in-flight shutdown.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified unless the actions have already been done.

Inspect 2nd Stage Nozzle Guide Vanes (NGV2)

(f) At the next shop visit or the next accessibility of the NGV2 after the effective date of this AD, whichever occurs first, check the thickness of the material on each NGV2 using the Instructions to be Incorporated of Turbomeca Mandatory Service Bulletin (MSB) No. 292 72 0231, Update No. 5, dated July 22, 2004. Replace the NGV2 if the vane thickness is below the defined criteria.

(g) Inspections carried out before the effective date of this AD, using an earlier update of MSB No. 292 72 0231, are acceptable alternatives to the requirements of this AD.

(h) Information regarding NGV2's that have already had the actions required by this AD done and are exempt from the inspections using paragraph (e) of this AD can be found in MSB No. 292 72 0231, Update No. 5, dated July 22, 2004.

Definitions

(i) For the purposes of this AD the following definitions apply:

(1) A shop visit is defined as introduction of the engine into a shop for the purposes of deep maintenance and the separation of a major mating flange.

(2) Accessibility of the NGV2 is defined as removal of the NGV2 from the engine regardless of the location or reason for removal.

Alternative Methods of Compliance (AMOCs)

(j) The Manager, Engine Certification Office, has the authority to approve alternative methods of compliance for this AD if requested using the procedures found in 14 CFR 39.19.

Related Information

(k) DGAC airworthiness directive No. F-20040-088 R1 also addresses the subject of this AD.

Issued in Burlington, Massachusetts, on October 31, 2005.

Francis A. Favara,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

SOCIAL SECURITY ADMINISTRATION

20 CFR Parts 404 and 416

RIN 0960-AG29

Age as a Factor in Evaluating Disability

AGENCY: Social Security Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: We are proposing to revise the definitions of the age categories we use

as one of the criteria in determining disability under titles II and XVI of the Social Security Act (the Act). The proposed changes reflect our adjudicative experience, advances in medical treatment and healthcare, changes in the workforce since we originally published our rules for considering age in 1978, and current and future increases in the full retirement age under Social Security law. The proposed changes would not affect the rules under part 404 of our regulations for individuals age 55 or older who have statutory blindness. They also would not affect our other rules that are dependent on age, such as the age at which you can qualify for early retirement benefits or for Medicare as a retired individual.

DATES: To be sure that your comments are considered, we must receive them no later than January 3, 2006.

ADDRESSES: You may give us your comments by: using our Internet site facility (i.e., Social Security Online) at <http://policy.ssa.gov/erm/rules.nsf/Rules+Open+To+Comment> or the Federal eRulemaking Portal at <http://www.regulations.gov>; e-mail to regulations@ssa.gov; telefax to (410) 966-2830, or letter to the Commissioner of Social Security, P.O. Box 17703, Baltimore, MD 21235-7703. You may also deliver them to the Office of Regulations, Social Security Administration, 100 Altmeyer Building, 6401 Security Boulevard, Baltimore, Maryland 21235-6401, between 8 a.m. and 4:30 p.m. on regular business days. Comments are posted on our Internet site, or you may inspect them on regular business days by making arrangements with the contact person shown in this preamble.

Electronic Version: The electronic file of this document is available on the date of publication in the **Federal Register** at <http://www.gpoaccess.gov/fr/index.html>.

FOR FURTHER INFORMATION CONTACT:

Robert Augustine, Social Insurance Specialist, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235-6401. Call (410) 965-0020 or TTY 1-800-325-0778 for information about these proposed rules. For information on eligibility or filing for benefits, call our national toll-free number 1-(800) 772-1213 or TTY 1-(800) 325-0778. You may also contact Social Security Online at <http://www.socialsecurity.gov/>.

SUPPLEMENTARY INFORMATION:
