SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee), requires the Service to develop a CCP for the Refuge. The purpose in developing a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish

and wildlife science; conservation; legal mandates; and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, the CCP identifies wildlife-dependent recreational opportunities available to the public, including opportunities for hunting; wildlife observation and photography; and environmental education and interpretation. We will review and update these CCPs at least every 15 years in accordance with the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, and the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370d).

Background: The Refuge was established in 1935 by President Franklin D. Roosevelt through Executive Order No. 7160 "as a refuge and breeding ground for migratory birds and other wildlife." The Refuge lies in the Lake Creek Valley on the northern edge of the Nebraska Sandhills and includes 16,410 acres of native sandhills, sub-irrigated meadows, impounded fresh water marshes, and tall and mixed grass prairie uplands.

The WMD was started as part of the Small Wetlands Acquisition Program, in the 1950s, to save wetlands from various threats, particularly draining. The passage of Public Law 85-585, in August of 1958, amended the Migratory Bird Hunting and Conservation Stamp Act (Duck Stamp Act) of 1934, allowing for the acquisition of Waterfowl Production Areas and Easements for Waterfowl Management Rights (easements). The WMD is located in Stanley, Todd, Harding, Jackson, Jones, Lawrence, Lyman, Meade, Mellette, Fall River, Haakon, Custer, Pennington, Bennett, and Butte counties.

Significant issues addressed in the Draft CCP/EA include: habitat and wildlife management; visitor services; cultural resources; and partnerships. The Service developed three alternatives for management of the Refuge: Alternative A—No Action; Alternative B—Integrated Restoration (Proposed Action); Alternative C—Comprehensive Grassland Restoration. All three alternatives outline specific management objectives and strategies related to wildlife and habitat management, visitor services, cultural resources, and partnerships.

Alternative A—Current Management (No Action): Under this alternative, management activity being conducted by the Service would remain the same. The Service would not develop any new management, restoration, or education programs at the Refuge. Current habitat
