- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or

CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- viii. Make sure to submit your comments by the comment period deadline identified.

II. What Action is the Agency Taking?

EPA is printing a summary of each pesticide petition received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or amendment of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that these pesticide petitions contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of these pesticide petitions. Additional data may be needed before EPA rules on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of the petitions included in this notice, prepared by the petitioner along with a description of the analytical method available for the detection and measurement of the pesticide chemical residues is available

on EPA's Electronic Docket at <http://www.regulations.gov>. To locate this information on the home page of EPA's Electronic Docket, select "Quick Search" and type the OPP docket ID number. Once the search has located the docket, clicking on the "Docket ID" will bring up a list of all documents in the docket for the pesticide including the petition summary.

New and Amended Tolerances

PP 3E6802 and 6E7068. The Interregional Research Project No. 4 (IR-4), 681 Highway 1 South, North Brunswick, NJ 08902-3390, proposes to establish tolerances for residues of the insecticide spinosad in or on food commodities: Hops at 22 parts per million (ppm) (6E7068); and amaranth, grain, stover at 10 ppm (3E6802); and to increase existing tolerances for cattle, meat at 2 ppm (3E6802); sheep, meat at 2 ppm (3E6802); goat, meat at 2 ppm (3E6802); horse, meat at 2 ppm (3E6802); poultry, meat at 0.1 ppm; cattle, fat at 50 ppm (3E6802); sheep, fat at 50 ppm (3E6802); goat, fat at 50 ppm (3E6802); horse, fat at 50 ppm (3E6802); poultry, fat at 1.3 ppm; milk at 7.0 ppm (3E6802); milk, fat at 85 ppm (3E6802); and egg at 0.3 ppm (3E6802).

Additionally, existing tolerances for meat by products which are currently based on residues in liver will be amended to establish separate liver tolerances and lower the meat byproducts tolerances which will now be based on residues in the kidney as follows: Cattle, meat byproducts, except liver at 5 ppm (3E6802); sheep, meat byproducts, except liver at 5 ppm (3E6802); goat, meat byproducts, except liver at 5 ppm (3E6802); horse, meat byproducts, except liver at 5 ppm (3E6802); poultry meat byproducts tolerance raised from 0.03 ppm and set at 0.1 ppm (3E6802); cattle, liver at 10 ppm (3E6802); sheep, liver at 10 ppm (3E6802); goat, liver at 10 ppm (3E6802); and horse, liver at 10 ppm (3E6802). There is a practical method liquid chromatography mass spectrometry - atmospheric pressure chemical ionization (LCMS-APCI) for detecting and measuring levels of spinosad in or on food with a limit of detection (0.002 ppm) that allows monitoring of food with residues at or above the level set for these tolerances. The method had undergone successful EPA laboratory validation is use to measure and evaluate the chemical residues.
