

standards and not the operating conditions under which compliance was achieved. An annual summary report is also required.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least two years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 10.35 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of each grain terminal elevator or any grain storage elevator.

Estimated Number of Respondents: 200.

Frequency of Response: On occasion, initially and annually.

Estimated Total Annual Hour Burden: 2,070 hours.

Estimated Total Annual Costs: \$167,108, which includes \$0 Capital/startup expense, \$0 Operations and Maintenance costs, and \$167,108 Respondent Labor costs.

Changes in the Estimates: There was an increase of 1,811 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The increase in burden hours from the most recently approved ICR is

due primarily to a more accurate accounting of existing sources, an annual summary report that was inadvertently left out, a revised labor rate, and the fact that we are presently accounting for management and clerical person hours per year, which was not shown in the previous ICR.

After a thorough analysis by the National Grain and Feed Association, they arrived at two hundred as the number of sources that are subject to subpart DD, as compared to one hundred and thirty-two in the previous ICR.

There are no capital or operations and maintenance costs since there is no continuous monitoring.
