#### SUPPLEMENTARY INFORMATION:

##### I. Information About the Project/Document

Information about waterborne disease outbreaks (WBDOs) in the United States is voluntarily reported by State, territorial and local public health agencies to the Centers for Disease Control and Prevention (CDC). CDC and EPA jointly maintain a WBDO database. The database describes outbreak attributes including, among other things, the drinking water system deficiency, the etiologic agent, and the number of individuals who became ill. Underreporting of such events is assumed but the magnitude of underreporting is unknown.

This draft document presents an approach for estimating the epidemiologic and economic burden of disease associated with 665 WBDOs

reported in the U.S. between 1971 and 2000. The term *disease burden* broadly refers to the magnitude of the impact incurred by society as a consequence of disease in the community (e.g., decrements in a population's health or the associated economic effects) and there are various metrics that can be employed by analysts to quantify burden. In order to capture some of the benefits of drinking water regulations, EPA has typically expressed waterborne disease impacts in terms of epidemiologic and monetary measures; this WBDO burden analysis employs those same measures. Because not all WBDOs in the United States and associated cases of illness are reported, the WBDO database on which this draft document is based is not comprehensive. The extent to which WBDOs are not recognized is unknown and is not examined in this analysis. This draft report develops several quantitative sensitivity analyses to characterize some of the uncertainty in the burden estimates but does not provide an evaluation of the potential impact of under- or overreporting of WBDOs or their associated severity characteristics. The draft report includes recommendations for the collection and reporting of additional outbreak information that would improve the usefulness of the WBDO database for future disease burden estimates.
