Title: Assessment of EPA Partnership Programs.

ICR numbers: EPA ICR No. 2225.01.

ICR Status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Environmental Protection Agency (EPA) is seeking approval for a three-year generic clearance from the Office of Management and Budget (OMB) to develop a generic ICR to collect data to be used for performance measurement of EPA Partnership Programs. This will be a voluntary collection of information to assess the activities of EPA Partnership Programs. Performance

measurement data collected will detail awareness of associated environmental results. EPA proposes to administer surveys and questionnaires to assess activities for program purpose and design, strategic planning, program management, and program results to determine if the goals of the program are being met.

All assessments undertaken under this ICR will follow stringent procedures to ensure that data are collected and used properly and efficiently. This ICR will provide anecdotal data for the purpose of informing EPA of the perceived effectiveness of partnership programs and will also allow partnership programs to collect data on the environmental results of partner activities due to participation. The information collection is voluntary, and will be limited to non-sensitive data concerning participation in partnership programs.

To help fulfill the broad mandate of protecting human health and the environment, EPA works with businesses, communities, state and local governments, and other organizations to achieve environmental goals through partnership programs. Partnership programs provide organizations with the information and assistance necessary to achieve and maintain various environmental goals.

EPA believes that measuring the performance of partnership programs is important to ensure that partnership programs are reaching the intended audience, providing valuable resources, and achieving the desired environmental results. Understanding this will allow EPA to better design and manage these partnership programs to meet the needs of the participants and to meet EPA's environmental goals. A generic ICR will significantly increase the ability of EPA Partnership Programs to: Determine and evaluate the effectiveness of these partnership programs as well as help the programs obtain data to successfully complete PART reviews; increase the consistency of program performance data as an alternative/adjunct to traditional regulatory approaches for achieving environmental results; minimize approval burden on OMB as submissions will be shorter and of higher quality via the generic ICR process; and reduce burden on potential respondents by limiting the number of requests for information.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.2 hours per response. Burden means the total time,

effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Participants in all of EPA's Partnership Programs, including businesses, governments, and members of the community.

Estimated Number of Respondents: 5,334.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 11,556 hours.

Estimated Total Annual Cost: \$769,702, which includes \$0 capital and O&M.

Dated: October 31, 2006.

Oscar Morales,

Director, Collection Strategies Division.
