

Rules and Regulations

Federal Register

Vol. 72, No. 94

Wednesday, May 16, 2007

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Grain Inspection, Packers and Stockyards Administration

7 CFR Parts 800 and 801

RIN 0580-AA95

Official Fees and Tolerances for Barley Protein Testing

AGENCY: Grain Inspection, Packers and Stockyards Administration, USDA.

ACTION: Final rule.

SUMMARY: We are adopting as a final rule, without change, an interim rule that previously extended the official inspection program to include testing of barley protein using near-infrared spectroscopy analyzers that were previously approved for different grains, established in the fee schedule a generic fee for all near-infrared measurements (NIR) and nuclear magnetic resonance (NMR) analyses, which is identical to existing fees. Also, we amended the regulations under the United States Grain Standards Act (USGSA) to establish performance tolerances for protein analyzers used to predict the percentage of protein in barley.

DATES: Effective: June 15, 2007.

FOR FURTHER INFORMATION CONTACT: John C. Giler, Acting Director, Field Management Division, at his e-mail address: John.C.Giler@usda.gov or telephone him at (202) 720-0228.

SUPPLEMENTARY INFORMATION:

Background

On November 4, 2004, GIPSA issued a **Federal Register** notice (69 FR 64269–64270), announcing an intent to implement barley protein measurement as official criteria under the United States Grain Standards Act (USGSA) effective July 1, 2005. The **Federal Register** notice is available on the GIPSA Web site at <http://www.gipsa.usda.gov>.

On November 8, 2006, GIPSA issued a **Federal Register** interim rule (71 FR 65371–65373) seeking comments on GIPSA's intention to extend its official inspection program to include testing of Barley protein and to establish a fee for such testing. There were no comments received on this request.

This provides the barley industry with accurate results for protein that the market can rely on to negotiate price, value, and premium.

Fees

GIPSA collects fees for providing official testing services to cover, as nearly as practicable, GIPSA's costs for performing the service, including related administrative and supervisory costs. Testing procedures and time necessary to determine protein in barley using the approved near-infrared transmittance (NIRT) analyzers are the same as those required for NIRT wheat protein; soybean oil and protein; and corn oil, protein, and starch determinations. Accordingly, the fee to test barley is the same as for tests for the above cited commodities. The fee is \$2.25 per test when the service is performed at an applicant's facility in an onsite FGIS laboratory, and for services performed at a location other than an applicant's facility in an FGIS laboratory the fees will be \$10.00 per test for an original inspection service and \$17.70 per test for an appeal inspection service.

Further, since the fees for near-infrared (NIR) analysis are the same as the fees for nuclear magnetic resonance (NMR) analysis, these fees are included in a generic NIR and NMR analysis fee. This should simplify the fee schedule and will not require a regulatory fee change when new NIR and NMR analysis are available for other grain products. Specifically, in 7 CFR 800.71, in tables 1 and 2, we will add a single new fee for "NIR and NMR analysis (protein, oil, starch, etc.)" to replace the individual fees currently listed for the following 4 categories: (1) Corn oil, protein, and starch (one of any combination), (2) soybean protein and oil (one or both), (3) wheat protein (per test), and (4) sunflower (per test). We renumbered the remaining fees listed in table 1, section 2 and table 2, sections 1 and 2. We are not making any other changes to the remaining fee amounts or categories at this time.

Tolerances

We run standard reference samples through the equipment to evaluate the accuracy of the equipment; for barley, the standard reference samples sets typically weigh between 650 and 750 grams. Due to the natural variation in individual kernels of barley and other sources of variability, each time we test the barley the testing equipment is likely to produce slightly different results. Therefore, we determine the allowable amount of differences between the test results from the standard reference sample and the expected outcome. We refer to this amount as the tolerance, which is the variation we allow for the equipment to produce accurate results.

We determined that, based upon the performance of the instruments and calibration, the maintenance tolerance will be ± 0.20 percent mean deviation from the national standard NIRS instruments for the NIRS analyzers used in performing official inspections. We determined that this level of accuracy will provide reliable testing procedures and accurate results to meet prospective official customer needs and that the market can rely on to negotiate price, value, and premium. We will apply this tolerance according to testing instructions found in the GIPSA Near-Infrared Transmittance (NIRT) Handbook.

We are adding this tolerance as a new paragraph (b)(4) in 7 CFR 801.7. Previously, 7 CFR 801.7(b) only included tolerances for (1) NIRS wheat protein analyzers, (2) NIRS soybean oil and protein analyzers, and (3) NIRS corn oil, protein, and starch analyzers. As with other commodities for which NIRS analyzers are used, we will use the chemical reference protein determinations to reference and calibrate official NIRS instruments in accordance with the Combustion Method, AOAC International Method 992.23, which we previously incorporated by reference into 7 CFR 801.7(b). No change to the incorporation is required for barley protein testing.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been determined to be not significant for purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget (OMB).

The Administrator of GIPSA has determined that this rule will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Currently, near-infrared spectroscopy analyzers are being used to determine wheat protein; soybean oil and protein; and corn oil, protein, and starch in both domestic and export markets. This rule establishes tolerances to expand the use of currently approved near-infrared spectroscopy analyzers to test barley protein and establishes a generic fee for all NIR and NMR testing that is identical to current fees. Testing for barley protein is included in this fee. There are 58 official agencies (46 private entities, 12 States) that are designated and/or delegated by GIPSA to perform official grain inspection services. Most of the agencies could be considered small entities under Small Business Administration criteria.

The extent to which these agencies will choose to provide this service is difficult to quantify because GIPSA is offering this service on a request basis, and locations where service is requested infrequently may make arrangements with neighboring agencies to provide the service (7 CFR 800.196(g)(1)). GIPSA believes that offering this service would have a beneficial effect on those agencies electing to provide the service.

For the 2006/2007 Market Year (June to May), USDA's Economic Research Service estimated the U.S. Barley Supply to be 303,000,000 bushels. Between June 2006 and September 2006 (the months for which we have data), 20,010,000 bushels of barley were tested for protein. Ten of the 58 official agencies, performed barley protein tests in the first 11 months of fiscal year 2006. There were 5,176 barley protein tests performed; of those 2,624 were tests performed for trucks and rail cars, 2,546 were tests performed on submitted samples, and 6 were performed locally, such as within a grain elevator.

According to USDA's National Agricultural Statistics Service, there are 24,747 farms (producers) in the barley for grain category. We do not have estimates for the number of grain handlers, exporters, and feedlot operators that may be involved in submitting barley for protein testing. In general, many producers, grain handlers, exporters, and feedlot operators may be considered small entities under Small Business Administration criteria. Further, grain handlers and exporters often use testing results to determine value and premiums. The extent to which these

entities will request the official barley protein or the impact of offering this service is difficult to quantify. GIPSA believes that barley producers, feedlot operators, grain handlers, and exporters will rely on the official system to provide reliable testing procedures and accurate results that the market can rely on to negotiate price, value, and premiums.

Fees currently are charged for NIR testing. The fees charged by GIPSA are \$2.25 per test when the service is performed at an applicant's facility in an onsite FGIS laboratory, and when an inspection service is performed at a location other than an applicant's facility in an FGIS laboratory the fees are \$10.00 per test for an original inspection service and \$17.70 for an appeal inspection service. The generic fee is the same as fees charged for current individual tests and their impact on applicants for services will vary depending upon usage since these tests are on a request basis.

Executive Order 12988

Executive Order 12988, Civil Justice Reform, instructs each executive agency to adhere to certain requirements in the development of new and revised regulations in order to avoid unduly burdening the court system. This final rule has been reviewed under this Executive Order. This final rule is not intended to have a retroactive effect. The United States Grain Standards Act provides in Section 87g that no State or subdivision may require or impose any requirements or restrictions concerning the inspection, weighing, or description of grain under the Act. Otherwise, this final rule will not preempt any State or local laws, regulations, or policies unless they present irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this interim rule.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995, the recordkeeping and reporting burden imposed by parts 800 and 801 were previously approved by OMB under control number 0580-0013 and will not be affected by this rule.

GIPSA is committed to compliance with the Government Paperwork Elimination Act, which requires Government agencies, in general, to provide the public the option of submitting information or transacting business electronically to the maximum extent possible.

List of Subjects

7 CFR Part 800

Administrative practice and procedure, Conflict of interests, Exports, Freedom of information, Grains, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements.

7 CFR Part 801

Exports, Grains, Scientific equipment.

■ For the reasons set out in the preamble, we are amending 7 CFR parts 800 and 801 as follows:

Authority: 7 U.S.C. 71–87k.

PART 800—GENERAL REGULATIONS

■ The interim final rule amending 7 CFR parts 800 and 801, which was published in the November 8, 2006, **Federal Register** at 71 FR 65371–65373, is adopted as a final rule, without change.

James E. Link,

Administrator, Grain Inspection, Packers and Stockyards Administration.

BILLING CODE 3410-KD-P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 11 and 25

RIN 3150-AH99

Access Authorization Fees

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending the agency access authorization fees charged to licensees for work performed under the Material Access Authorization Program (MAAP) and the Information Access Authority Program (IAAP). The amended cost is due to an increase of the review time for each application for access authorization. The formula for calculating fees remains the same as based on current Office of Personnel Management (OPM) billing rates for personnel background investigations. The formula is designed to recover the full cost of processing a request for access authorization from the licensee. The use of the fee assessment formula tied to current OPM billing rates eliminates the need for the NRC to update its access authorization fee schedules through regular rulemakings.

DATES: The effective date of the final rule is June 15, 2007.
