The Commission adopted bidding credits for use by winning bidders who pledge facilities and provide service to federally-recognized tribal areas that have a telephone service penetration rate at or below 70 percent. In setting out the bidding credit, the Commission noted that communities on tribal lands have had less access to telecommunications services than any other segment of the U.S. population. For information collection purposes, a winning bidder credit to serve a qualifying tribal and within a particular

market must indicate on the long-form application (FCC Form 601) that it intends to serve a qualifying tribal land within that market; within 180 days after the filing deadline for the long-form application, amend its long-form application to identify the tribal lands it intends to serve and attach a certification from the tribal government stating that: (1) The tribal government authorizes the winning bidder to site facilities and provide service on its tribal land; (2) the tribal area to be served by the winning bidder constitutes qualifying tribal land; (3) the tribal government has not and will not enter into an exclusive contract with the applicant precluding entry by other carriers, and will not unreasonably discriminate among wireless carriers seeking to provide on the qualifying tribal land; and (4) provide certification of the telephone penetration rates demonstrating that the tribal land has a penetration level at or below 70 percent.

Also, each winning bidder must within 180 after the filing deadline for the FCC Form 601, certify by endorsing the Schedule B of the FCC Form 601, that it will comply with the build-out requirements and consult with the tribal government regarding the location of the facilities and deployment of service on the tribal land; within 15 days of the third anniversary of the initial grant of its license, file a notification (Schedule K of the FCC Form 601) that it has constructed and is operating a system capable of serving 75 percent of the population of the qualifying tribal land for which the credit was awarded; and repay within 30 days of the third anniversary of the initial grant of its license, the bidding credit amount in its entirety, plus interest, if it fails to provide the post-construction notification (Schedule K of the FCC Form 601) required by 47 CFR 1.2110(f)(3)(vi).

In addition, a winning bidder seeking a credit in excess of the amount calculated under the Commission's bidding credit formula must: (1) Submit a waiver request demonstrating that the infrastructure costs exceed the amount of the standard bidding credit; and (2) include a certification by an independent auditor that the estimated costs are reasonable. A winning bidder receiving a higher credit must within 15 days of the third anniversary of the initial license grant, file a certification that the credit amount was spent on infrastructure to provide wireless coverage to qualifying tribal lands, which also includes a final report prepared by an independent auditor verifying that the infrastructure costs are

reasonable to comply with the Commission's build-out requirements.

The Commission believes that the lack of telecommunications services puts affected tribal communities at a social and economic disadvantage. This information will be used to ensure that tribal communities within federally-recognized tribal areas have access to wireless telecommunications services equivalent to that of the nation.
