Background

The Spirit of Service Awards enable the Corporation to recognize exceptional organizations and program participants from each of the Corporation's three programs, Senior Corps, AmeriCorps, and Learn and Serve America. The Corporation plans to continue to utilize specific nomination guidelines for each of the programs and follow a formal

nomination process, which involves voluntary information collection from non-government individuals.

Since its 2004 the Corporation has honored distinguished individuals and organizations with the Spirit of Service Awards. Prior to 2003, AmeriCorps recognized its outstanding it outstanding members annually through the All-AmeriCorps Awards, which were initiated 1999 and presented by President Clinton as part of the 5th anniversary celebration of the program. Senior corps had recognized its outstanding projects and volunteers at its own national conference, and Learn and Serve America recognized exemplary programs and participants through its Leaders School selection and the President's Student Service Awards.

Current Action

The Corporation is soliciting public comments so it can obtain renewed approval from OMB for a three year time period of the Spirit of Service Awards nomination for its three programs. The goal is to continue the nomination process in order to select the annual Spirit of Service Award winners in time to receive their awards during the Corporation's Annual National Conference on Community Volunteering and National Service.

POLICY JUSTIFICATION

Iraq – Technical Assistance for Construction of Facilities and Infrastructure

The Government of Iraq has requested a possible sale of technical assistance services to ensure provision of adequate facilities and infrastructure in support of the recruitment, garrison, training, and operational facilities and infrastructure for the Iraqi Security Forces. The U.S. Air Force Center for Environmental Excellence (AFCEE) will provide engineering, planning, design, acquisition, contract administration, construction management, and other technical services for construction of facilities and infrastructure (repair, rehabilitation, and new construction) in support of the training, garrison, and operational requirements of the Iraqi Ministry of Defense. The scope of the program includes technical assistance for construction of facilities and infrastructure in support of twelve separate construction projects throughout Iraq. The facilities and infrastructure planned include new temporary vehicle storage facilities, medical clinics, hospital steam plant, security walls, training barracks/facilities, dining facilities, recruit training facilities, training, maintenance and supply buildings, and utilities systems (including heating, water, sewer, and electricity). The facilities to be provided at the regional brigade locations include barracks, training, maintenance, and storage facilities, medical clinic, communications center, and required utilities. Services include support, personnel training and training equipment, acquisition of engineer construction equipment, technical assistance to Iraqi military engineers, other technical assistance, contractor engineering services, and other related elements of logistic support. The estimated cost is \$350 million.

This proposed sale would contribute to the foreign policy and national security of the U.S. by enhancing Iraq's capacity to support USG Operation Iraqi Freedom efforts, and by supporting Iraq's legitimate need for military independence.

This proposed sale would enable Iraq to support the recruitment, training, bed-down, and operational effectiveness of its military; to establish security and stability throughout Iraq; and to promote the stability and development of a friendly, democratic central government.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The AFCEE is the principal organization that will direct and manage this program. The AFCEE will provide services through both in-house personnel and contract services. Contracts will be procured in accordance with Federal Government contracting law and regulations. There are no known offset agreements proposed in connection with this potential sale.

The estimated number of U.S. Government and contractor representatives to be assigned to Iraq to implement the provisions of this proposed sale will vary between 15 and 100 representatives. The ultimate number will be determined during the program execution.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
