

hazardous substances into the environment at or from the Site. Additionally, the United States and the State of Indiana sought recovery of damages for injury to, loss of, or destruction of natural resources at or near the Site against alleged generators of hazardous waste disposed of at the Site ("Generator Consent Decree"), pursuant to Section 107(f) of CERCLA, 42 U.S.C. 9607(f).

The Generator Consent Decree would resolve the United States' cost recovery and injunctive relief claims with regard to the Site against Settling Defendants under Sections 106 and 107(a) of CERCLA, 42 U.S.C. 9606 and 9607(a) through Settling Defendants' payment to the Superfund of \$1.12 million in past response costs through costs through November 30, 2005, and Settling Defendants' financing and performing the remaining work under the Record of Decision to complete the remedy at the Site. The Generator Consent Decree would also resolve the United States' and the State of Indiana's claim for damages to natural resources at or near the Site against Settling Defendants through Settling Defendants' Reimbursement of \$50,000 in assessment costs (\$35,000 to the U.S. Department of Interior (DOI) and \$15,000 to the State of Indiana), and payment of \$200,000 into the Natural Resource Damage Assessment and Restoration Fund to fund DOI and State Co-Trustee sponsored restoration projects.

As a condition of settlement under the Generator Consent Decree, Settling Defendants would relinquish all claims or causes of action with respect to the Site or natural resource damages against the United States or the States of Indiana. In return, the Settling Defendants would receive contribution protection and a covenant not to sue from the United States under Section 106 and 107(a) with regard to the Site, and from the United States and the State of Indiana under Section 107(f) of CERCLA for natural resource damages at or near the Site, Subject to certain reservations of rights.

The Lindsay Consent Decree would resolve the United States' cost recovery claims with regard to the Site against Mr. Lindsay under Section 107(a) of CERCLA through a reimbursement to the Superfund of \$3,000. This payment amount is based upon a documented limited ability to pay. As a condition of settlement under the Lindsay Consent Decree, Mr. Lindsay would relinquish all claims or causes of action with respect to the Site against the United States. In return, Mr. Lindsay would receive contribution protection and a

covenant not to sue from the United States under Section 106 and 107(a) with regard to the Site, subject to certain reservations of rights.

Notice of Lodging of Consent Decree Under the Residential Lead-Based Paint Hazard Reduction Act

Notice is hereby given that on May 14, 2007, a proposed consent decree in *United States v. Linder & Associates*, Civil Action No. 07-3152 MMM (FMOx), was lodged with the United States District Court for the Central District of California.

The consent decree settles claims against the management company of residential properties containing approximately 500 units located in Los Angeles, Victorville, North Hills and Inglewood, California. The claims were brought on behalf of the Department of Housing and Urban Development, ("HUD"), and the Environmental Protection Agency, ("EPA") under the Residential Lead-Based Paint Hazard Reduction Act 42 U.S.C. 4851 *et seq.* ("Lead Hazard Reduction Act"). The United States alleged in the complaint that the defendant failed to make one or more of the disclosures or to complete one or more of the disclosure activities required by the Lead Hazard Reduction Act.

Under the consent decree, Linder will certify that it is complying with residential lead paint notification requirements. The defendant has inspected all of its non-studio apartments for lead-based paint and will inspect 254 studio units within thirty (30) days of entry of the consent decree. Linder has agreed to abate any lead found to be in fair or deteriorating condition and will apply interim controls to any paint found to be in intact condition. All window units will be replaced in every unit found to contain lead, regardless of whether it is a studio unit or not. The timing of window replacement varies from four (4) to six (6) years, depending on whether the unit is a studio unit and whether the unit houses a child or children under six years of age.

In addition, the defendant will pay an administrative penalty of \$7,700 to the United States and \$2,300 in costs to the State of California.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the consent decree.
