

EELV to take place at south VAFB over a 1-year period, contingent upon adherence to the previously mentioned mitigation, monitoring, and reporting requirements. NMFS has determined that the impact of harbor activities related to the Delta IV/EELV at VAFB (transport vessel operations, cargo movement activities, harbor maintenance dredging, and kelp habitat mitigation) will result in the Level B Harassment of small numbers of Pacific harbor seals, California sea lions, and northern elephant seals. The effects of ULA's harbor activities are expected to be in the form of short-term and localized behavioral changes and no take by injury or death is anticipated or authorized. NMFS has further determined that these takes will have a negligible impact on the affected marine mammal species and stocks. Northern fur seals, Guadalupe fur seals, and Steller sea lions are unlikely to be found in the area and, therefore, will not be affected. No rookeries, mating grounds, areas of concentrated feeding, or other areas of special significance for marine mammals occur within or near south VAFB harbor.

#### Authorization

NMFS has issued an IHA to take marine mammals, by Level B harassment, incidental to conducting harbor activities at VAFB to ULA for a 1-year period, provided the mitigation, monitoring, and reporting requirements are undertaken.

**Background**

The Corporation is a federal government agency that encourages Americans of all ages and backgrounds to engage in community-based service to meet the nation's educational, public safety, environmental, homeland

security, and other human needs. Through its program, Learn and Serve America, the Corporation provides resources to K-12 schools, higher education institutions, and community-based organizations for the promotion and sustainability of service-learning activities. Since Learn and Serve America was established in 1990, it has been the catalyst for a wide expansion of community service and service-learning in America's schools, colleges and youth service organizations. In 1984, approximately nine percent of schools in the United States offered service-learning opportunities. By 1999, about one-third of all K-12 public schools in the United States offered service-learning for their students. A new study of the prevalence of service-learning in K-12 schools will allow Learn and Serve America to continue to assess the extent to which its efforts and those of other organizations that promote service-learning have led to the growth of service-learning. Information collected through this survey will be used by the Corporation to track progress on key Strategic Plan and Learn and Serve performance measures.
