

Specifically, Gulf South proposes to construct, own, operate, and maintain two new compressor stations, the Whistler Junction Compressor Station (Whistler Junction) and the Airport Junction Compressor Station (Airport Junction) in Mobile County, Alabama, to satisfy the growing demand for natural gas in the Southeastern United States. These compressor stations are designed to deliver, on a firm basis, 250,000 Dth per day to Gulfstream Natural Gas System, L.L.C. (Gulfstream), an interstate pipeline, at an existing interconnect near Coden, Alabama in Mobile County. Whistler Junction will consist of one 4,680 horsepower Solar Centaur 40–4700S turbine engine equipped with Solar's "SoLoNO_x" system. Airport Junction will consist of one 4,735 horsepower Caterpillar G3616 TALE reciprocating engine equipped with a low-NO_x burner system. A new office and controls building will also be constructed. No wetlands are impacted by the project. All construction will be contained within Gulf South's property. Gulf South will finance the facilities with funds on hand. The estimated cost of the facilities is \$22,985,103.

Any questions regarding the application should be directed to J. Kyle Stephens, Vice President, Regulatory Affairs, Gulf South Pipeline Company, LP, 20 East Greenway Plaza, Suite 1000, Houston Texas 77046, or call at (713) 479–8033.
