SUPPLEMENTARY INFORMATION: Development of the PEIS/EIR for the Program is being carried out under Congressional authorization granted to the Secretary of the Interior under section 3406(c)(1) of the Central Valley Project Improvement Act (CVPIA) and will serve as the initial planning and environmental review activities necessary to implement the Settlement described below.

In 1992, Congress passed the CVPIA (Pub. L. 102-575, Title XXXIV) in order to protect, restore, and enhance fish, wildlife, and associated habitats in California's Central Valley. Specifically, CVPIA Section 3406(c)(1) requires the Secretary of the Interior to "[d]evelop a comprehensive plan, which is reasonable, prudent, and feasible, to address fish, wildlife, and habitat concerns on the San Joaquin River, including but not limited to the streamflow, channel, riparian habitat, and water quality improvements that would be needed to reestablish where necessary and to sustain naturally reproducing anadromous fisheries from Friant Dam to its confluence with the San Francisco Bay/Sacramento-San Joaquin Delta Estuary."

In 1988, a coalition of environmental groups, led by the Natural Resources Defense Council (NRDC), filed a lawsuit challenging the renewal of the long-term water service contracts between the

United States and the Central Valley Project, Friant Division contractors. After more than 18 years of litigation of this lawsuit, known as the *Natural Resources Defense Council et al., v. Rodgers, et al.*, a Settlement was reached. On September 13, 2006, the Settling Parties reached agreement on the terms and conditions of the Settlement which was subsequently approved by the Court on October 23, 2006. The "Settling Parties" include the NRDC, Friant Water Users Authority, and the Departments of the Interior and Commerce.

The Settlement is based on two parallel goals:

- To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish (Restoration Goal); and

- To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement (Water Management Goal).

The Settlement states that the Secretary of the Interior will implement the terms and conditions of the Settlement. Additionally, the Settling Parties agreed that implementation of the Settlement will also require participation of the State of California (State). Therefore, concurrent with the execution of the Settlement, the Settling Parties entered into a Memorandum of Understanding (MOU) with the State (by and through the California Resources Agency, DWR, DFG, and the California Environmental Protection Agency) regarding the State's role in the implementation of the Settlement. The "implementing agencies", which include Reclamation, USFWS, NMFS, DWR, and DFG, are responsible for the management of the Program to implement the Settlement.
