Part 234 gives air travelers information concerning their chances of on-time flights and the rate of mishandled baggage by the 20 largest scheduled domestic passenger carriers.

Reducing and Identifying Traffic Delays

The Federal Aviation Administration (FAA) uses Part 234 data to pinpoint and analyze air traffic delays. Wheels-up and wheels-down times are used in conjunction with departure and arrival times to show the extent of ground delays. Actual elapsed flight time, wheels-down minus wheels-up time, is compared to scheduled elapsed flight time to identify airborne delays. The reporting of aircraft tail number allows the FAA to track an aircraft through the air network, which enables the FAA to study the ripple effects of delays at hub airports. The data can be analyzed for airport design changes, new equipment purchases, the planning of new runways or airports based on current and projected airport delays, and traffic levels. The identification of the reason for delays allows the FAA, airport operators, and air carriers to pinpoint delays under their control.

Currently, BTS has an open docket 28522, which requests comments on how the DOT can improve this data collection. Specifically, should the DOT

collect additional information regarding tarmac delays when the flight returns to the airport gate, when the flight is diverted or when the flight is cancelled. After the comments are reviewed, the DOT will issue a notice of proposed rulemaking, if necessary, and a new Information Collection Package will be sent to OMB.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for statistical and non-statistical purposes. Purposes include, but are not limited to, publication of both respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued in Washington, DC, on August 29, 2007.

Acting Assistant Director, Airline Information, Bureau of Transportation Statistics.
