AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA's Office of Pesticide Programs will host two public meetings regarding pesticide worker protection issues in October. A Pesticide Worker Safety and Health Conference will be held on October 2-4, 2007, in Arlington, VA, at the Hilton Hotel in Crystal City. The conference will provide an informational forum for federal and state agencies and private sector organizations involved in pesticide worker safety and health programs, policies and research initiatives. On the afternoon of October 4, 2007, the Office of Pesticide Programs will host a Diagnostic Tools Workshop in Arlington, VA, at the Hilton Hotel in Crystal City. Because health care providers lack tests to identify specific chemicals and/or levels of exposure that may be linked to the reported illnesses, the goal of this Workshop is to gather

information on critical diagnostic needs, the current state of the science, and research needs for and feasibility of developing diagnostic tools to identify exposure to a specific chemical/level.

DATES: The Pesticide Worker Safety and Health Conference will be held on October 2, 3, and 4, 2007, as follows: on October 2 from 1 p.m. to 6 p.m.; on October 3 from 8:30 a.m. to 5:30 p.m.; and on October 4 from 8:30 a.m. to noon. II. Background & Agendas

A. Pesticide Worker Safety and Health Conference

This Conference will focus on measuring the impact of current worker protection initiatives and developing effective interventions where protective gaps exist. The conference will also highlight the accomplishments of the Agency's worker protection initiatives in partnership with our grantees. Breakout sessions are planned for Wednesday, October 3 with expert presentations and panel discussions on: Take-home pesticide exposure and families of farmworkers; advances in engineering controls; education and training of farmworkers and pesticide applicators; administrative and policy solutions to better protect the pesticide workforce; risk communication strategies and lessons learned; the role of surveillance of occupational pesticide-related illnesses and injuries; worker exposure assessment, strengths and weaknesses in data collection.

B. Diagnostic Tools Workshop

One of the major challenges faced by health care professionals in the diagnosis and treatment of ailments associated with pesticide exposure is the lack of tests to identify specific chemicals and/or levels of exposure that may be linked to the reported illnesses. As a result, there is increasing interest in the development of more sophisticated diagnostic tools to help

clinicians diagnose and prescribe effective courses of treatment. The goal of the Diagnostic Tools Workshop is to gather information on critical diagnostic needs, the current state of the science, and the research needs for and feasibility of developing diagnostic tools to identify exposure to a specific chemical/level.

Planned agendas for both the Pesticide Worker Safety and Health Conference and the Diagnostic Tools Workshop are posted on the website at: www.epa.gov/pesticides.

III. How Can I Request to Participate in these Meetings?

Both of these meetings are open to the public. Persons interested in attending the Pesticide Worker Safety and Health Conference should go to EPA's website to register (at no cost) at: www.epa.gov/pesticides. The Diagnostic Tools Workshop is open to the public and seating is available on a first-come basis.
