

anticipated to result in any cumulative impacts at the site.

#### *Environmental Impacts of the Alternatives to the Proposed Action*

The only alternative to the proposed action of decommissioning the Facility is the no-action alternative, under which the staff would leave things as they are by simply denying the amendment request. This no-action alternative is not feasible because it conflicts with 10 CFR 40.42(d) requiring that decommissioning of source material facilities be completed and approved by the NRC after licensed activities cease. The no-action alternative would keep radioactive material on-site without disposal. Additionally, denying the amendment request would result in no change in current environmental impacts. The environmental impacts of the proposed action and the no-action alternative are therefore similar, and the no-action alternative is accordingly not further considered.

#### *Conclusion*

The NRC staff has concluded that the proposed action is consistent with NRC guidance and regulations. Because the proposed action will not significantly impact the quality of the human environment, the NRC staff concludes that the proposed action is the preferred alternative.

#### *Agencies and Persons Consulted*

NRC provided a draft of this Environmental Assessment to the State of Indiana, Department of the Environment for review on June 26, 2007. On November 2, 2007, Indiana State Department of Health, Radiological Emergency Response Program, responded by e-mail. The State agreed with the conclusions of the EA and otherwise had no comments.

### **III. Finding of No Significant Impact**

The NRC staff has prepared this EA in support of the proposed action. On the basis of this EA, the NRC finds that there are no significant environmental impacts from the proposed action, and that preparation of an environmental impact statement is not warranted. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate.
