BILLING CODE 9110-10-P

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service****Banks Lake National Wildlife Refuge**

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent to prepare a comprehensive conservation plan and environmental assessment for Banks Lake National Wildlife Refuge in Lanier County, Georgia.

SUMMARY: The Fish and Wildlife Service intends to gather information necessary to prepare a comprehensive conservation plan and environmental assessment for Banks Lake National

Wildlife Refuge. This notice is furnished in compliance with the Service's comprehensive conservation planning policy to advise other agencies and the public of our intentions, and to obtain suggestions and information on the scope of issues to be considered in the planning process.

DATES: To ensure consideration, comments must be received by January 7, 2008.

ADDRESSES: Comments, questions, and requests for more information regarding Banks Lake National Wildlife Refuge should be sent to: Ms. Laura Housh, Regional Planner, Okefenokee National Wildlife Refuge, Route 2, Box 3330, Folkston, Georgia 31537; Phone: 912/496-7366, Ext. 244; Fax: 912/496-3332; E-mail: laura_housh@fws.gov. You may find additional information concerning the refuge at the refuge's Internet site: <http://www.fws.gov/southeast/BanksLake>.

FOR FURTHER INFORMATION CONTACT: Mr. George Constantino, Refuge Manager, Okefenokee National Wildlife Refuge; Telephone: 912/496-7366.

SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee), requires the Service to develop a comprehensive conservation plan for each national wildlife refuge. The purpose in developing a comprehensive conservation plan is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, plans identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. Public input in this planning process is essential.

Each unit of the National Wildlife Refuge System is established with specific purposes. These purposes are used to develop and prioritize management goals and objectives with the National Wildlife Refuge System mission, and to guide which public uses will occur on the refuge. The planning process is a means for the Service and the public to evaluate management goals and objectives for the best possible conservation efforts of this important

wildlife habitat, while providing for wildlife-dependent recreation opportunities that are compatible with the refuge's establishing purposes and the mission of the National Wildlife Refuge System.

A comprehensive conservation planning process will be conducted that will provide opportunities for Tribal, State, Federal, and local governments; non-governmental organizations; and the public to participate in issue scoping and comment. The Service invites anyone interested to respond to the following questions:

1. What problems or issues do you want to see addressed in the comprehensive conservation plan?
2. What improvements would you recommend for Banks Lake National Wildlife Refuge?

The above questions have been provided for your optional use. You are not required to provide any information. The Planning Team developed these questions to gather information about individual issues and ideas concerning the refuge. The Planning Team will use comments it receives as part of the planning process; however, it will not reference individual comments or directly respond to them.

Special mailings, newspaper articles, and other media outlets will be used to announce opportunities for input throughout the planning process. An open house style meeting will be held to solicit comments during the scoping phase of the planning process.

The environmental review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321, *et seq.*); NEPA regulations (40 CFR parts 1500-1508); and other appropriate Federal laws and regulations. All comments received become part of the official public record. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Congress established Banks Lake National Wildlife Refuge in 1985, for the protection and conservation of its unique environment, as well as for migratory and resident wildlife. The refuge comprises 3,559 acres of open water, marsh, hardwood swamp, and uplands. The refuge coordinates with

State, Federal, and local agencies; The Nature Conservancy; Moody Air Force Base; and adjacent landowners to fulfill the mission of the National Wildlife Refuge System and promote sound ecological landscape management. Public use opportunities on the refuge include fishing, boating (e.g., small engine, canoe, and kayak), wildlife observation and photography, and hiking.

Authority: This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105–57.

Dated: October 31, 2007.

Cynthia K. Dohner,

Acting Regional Director.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Application for an Enhancement of Survival Permit Associated With the Reintroduction of Black-Footed Ferrets on the Northern Cheyenne Tribal Lands in Montana

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and receipt of application.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the receipt of an application for the reintroduction of black-footed ferrets on Northern Cheyenne Tribal lands in Montana pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (Act). The Service requests information, views, and opinions from the public via this notice.

DATES: Written comments on this request for a permit must be received by January 7, 2008.

ADDRESSES: Written data or comments should be submitted to the Assistant Regional Director, Fisheries—Ecological Services, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225–0486; facsimile 303–236–0027. Documents and other information submitted with this application are available for review, subject to the requirements of the Privacy Act [5 U.S.C. 552A] and Freedom of Information Act [5 U.S.C. 552], by any party who submits a request for a copy of such documents within 30 days of the date of publication of this notice to Kris Olsen, by mail or by telephone at 303–236–4256. All comments received from individuals

become part of the official public record.

FOR FURTHER INFORMATION CONTACT: Kris Olsen, Regional Permit Coordinator (ADDRESSES above), telephone 303–236–4256, or Pete Gober, Project Leader, South Dakota Ecological Services Office, 420 South Garfield Avenue, Suite 400, Pierre, South Dakota 57501, telephone 605–224–8693, extension 24.

SUPPLEMENTARY INFORMATION: The following applicant has requested issuance of an enhancement of survival permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Act.

Applicant—Northern Cheyenne Natural Resource Department, Lame Deer, Montana, TE–167158.

The applicant requests a permit to take black-footed ferret in conjunction with reintroduction and recovery activities throughout the Northern Cheyenne Reservation portion of the species' range for the purpose of enhancing its survival and recovery. The black-footed ferret is one of the rarest mammals in North America. Formerly co-occurring across the ranges of all prairie dog species, its distribution has been greatly reduced due to disease (plague), poisoning of prairie dogs, and human-related habitat alteration. The only known current populations are those in captivity and those started through reintroduction of captive-bred individuals. Protection of this species and enhancement of its habitat on Tribal land will benefit recovery efforts.

The primary objectives of the proposed action are to—(a) restore the native prairie ecosystem on the Northern Cheyenne, consistent with Northern Cheyenne and Native American traditions and values; (b) establish a viable, self-sustaining ferret population in South-central Montana consistent with the Conservation Plan for Black-tailed and White-tailed Prairie Dogs in Montana and the Black-footed Ferret Recovery Plan (U.S. Fish and Wildlife Service 1988); and (c) further test the effectiveness of methods to address the threat of Sylvatic plague (*Yersinia pestis*) on black-footed ferret survival in the wild by using vaccination and flea control methods. We have made the preliminary determination that the proposed activities will enhance survival and recovery of the black-footed ferret. This notice is provided pursuant to section 10 of the Act.

We will evaluate the permit application and the comments submitted therein to determine whether the application meets the requirements of section 10(a) of the Act. If it is

determined that those requirements are met, a permit will be issued for the reintroduction of the black-footed ferret. The final permit decision will be made no sooner than 30 days after the date of this notice.

Authority: The authority of this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) and the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.).

Dated: November 1, 2007.

Emily Jo Williams,

Acting Regional Director, Denver, Colorado.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR–930–6350–DQ–047H]

Notice of Extension of Comment Period for the Draft Environmental Impact Statement for the Revision of Resource Management Plans of the Western Oregon Bureau of Land Management Districts

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of extension.

SUMMARY: The Bureau of Land Management (BLM) announces an extension of the comment period on the Draft Environmental Impact Statement for the Revision of Resource Management Plans of the Western Oregon Bureau of Land Management Districts. The original notice published in the **Federal Register** on August 10, 2007 [72 FR 45062] and provided for a comment period to end on November 9, 2007. The BLM is extending the comment period to January 11, 2008.

FOR FURTHER INFORMATION CONTACT: Alan Hoffmeister, Western Oregon Plan Revisions Public Outreach Coordinator, at (503) 808–6629.

SUPPLEMENTARY INFORMATION: The original Notice of Availability provided for comments on the Draft IAP/EIS to be received through November 9, 2007. The BLM received requests for an extension of the comment period from individuals and groups. The BLM has decided to accede to these requests. Comments on the Draft Resource Management Plan and Environmental Impact Statement will now be accepted through January 11, 2008.
