SUPPLEMENTARY INFORMATION:**Background**

On June 2, 2006, the Department of Commerce ("the Department") published a notice of opportunity to request an administrative review of the antidumping duty order on stainless steel butt-weld pipe fittings from Taiwan for the period of review ("POR") of June 1, 2005, through May 31, 2006. *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation, Opportunity to Request Administrative Review*; 71 FR 32032 (June 2, 2006). On June 22, 2006, Flowline Division of Markovitz Enterprises, Inc. ("Flowline Division"), Gerlin, Inc., Shaw Alloy Piping Products, Inc., and Taylor Forge Stainless, Inc. (collectively, "petitioners") requested an antidumping duty administrative review for Ta Chen Stainless Pipe Co., Ltd. ("Ta Chen"), Liang Feng Stainless Steel Fitting Co., Ltd., Tru-Flow Industrial Co., Ltd., Censor International Corporation, and PFP Taiwan Co., Ltd. On June 29, 2006, Ta Chen requested an administrative review of its sales to the United States during the POR. On July 27, 2006, the Department published the notice initiating this administrative review. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation In Part*, 71 FR 42626 (July 27, 2006). The preliminary results are currently due not later than March 2, 2007.

**Extension of Time Limits for
Preliminary Results of Review**

Pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("the Act"), and 19 CFR § 351.213(h)(2), the Department may extend the deadline for completion of the preliminary results of a review by 120 days if it determines that it is not practicable to complete the preliminary results within 245 days after the last day of the anniversary month of the date of publication of the order for which the administrative review was requested. Due to the complexity of the issues involved and the time required to analyze Ta Chen's supplemental questionnaire responses, as well as the demands of other proceedings handled by the office administering this review, the Department has determined that it is not practicable to complete this review within the original time period. Accordingly, the Department is extending the time limit for the preliminary results by 120 days, to not

later than July 2, 2007, in accordance with Section 751(a)(3)(A) of the Act. The deadline for the final results of this review will continue to be 120 days after publication of the preliminary results.

This notice is published in accordance with sections 751(a)(3)(A) and 777(i) of the Act.

Dated: February 13, 2007.

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 021507C]

Fisheries Off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of an exempted fishing permit application (EFP); intent to issue the EFP; request for comments.

SUMMARY: NMFS announces the receipt of an exempted fishing permit (EFP) application, and the intent to issue EFPs for vessels participating in an observation program to monitor the incidental take of salmon and groundfish in the shore-based component of the Pacific whiting fishery. The EFPs are necessary to allow trawl vessels fishing for Pacific whiting to delay sorting their catch, and thus to retain prohibited species and groundfish in excess of cumulative trip limits until the point of offloading. These activities are otherwise prohibited by Federal regulations. The EFPs will be effective no earlier than April 1, 2007, and would expire no later than December 31, 2007, but could be terminated earlier under the terms and conditions of the EFPs and other applicable laws.

DATES: Comments must be received by March 9, 2007.

ADDRESSES: Send comments or request for copies of the EFP application to Gretchen Arentzen, Northwest Region, NMFS, 7600 Sand Point Way N.E., Bldg. 1, Seattle, WA 98115 0070 or email EFPwhiting2007.nwr@noaa.gov. Comments sent via email, including all attachments, must not exceed a 10 megabyte file size.

FOR FURTHER INFORMATION CONTACT:

Gretchen Arentzen or Becky Renko at (206)526 6140.

SUPPLEMENTARY INFORMATION: This action is authorized by the Magnuson-Stevens Fishery Conservation and Management Act provisions at 50 CFR 600.745, which state that EFPs may be used to authorize fishing activities that would otherwise be prohibited. At the November 2006 Pacific Fishery Management Council (Council) meeting in Del Mar, California, NMFS received an application for these EFPs from the States of Washington, Oregon, and California. An opportunity for public testimony was provided during the Council meeting. The Council recommended that NMFS issue the EFPs, as requested by the States, and forwarded the EFP applications to NMFS.

Each year since 1992, EFPs have been issued to vessels in the Pacific whiting shoreside fishery to allow unsorted catch to be landed. Without an EFP, groundfish regulations at 50 CFR 660.306(a) require vessels to sort their catch at sea. The vessels fishing under the EFPs are required to deliver catch to designated processors. EFPs have been used to: track the incidental take of Chinook salmon as required in the Endangered Species Act (ESA) Section 7 Biological Opinion for Chinook salmon catch in the Pacific whiting fishery; and to track the catch of whiting and other groundfish species such that the fishing industry is not unnecessarily constrained and that the OYs, harvest guidelines, sector allocation and overfished species bycatch limits are not exceeded.

Over the past five years, the number of vessels issued these EFPs has been between 31 and 38 vessels. Issuance of the 2007 EFPs, to approximately 40 vessels, will allow samplers located at the shoreside processing facilities to collect information on the incidental catch of salmon and groundfish in unsorted whiting deliveries. Unlike the at-sea sectors of the Pacific whiting fishery, where catch is sorted and processed shortly after it has been taken, vessels in the shoreside fishery must hold primary season Pacific whiting on the vessel for several hours or days until it can be offloaded at a shoreside processor. Pacific whiting deteriorates rapidly, so it must be handled quickly and immediately chilled to maintain product quality. This is particularly true if the Pacific whiting is to be used to make surimi (a fish paste product). The quality or grade of surimi is highly dependent on the freshness of the Pacific whiting, which demands careful
