

installed capacity of the Holtwood Project by constructing a new powerhouse with two turbine generator units, installing two new generating units in the existing powerhouse, and refurbishing four generating units in the existing powerhouse (Units 1, 2, 4, and 7). The total installed capacity of the project would increase from 107.2 megawatts to 195.5 megawatts and the total hydraulic capacity of the project would increase from 31,500 cubic feet per second to approximately 61,460 cubic feet per second. PPL Holtwood also proposes to construct a new skimmer wall upstream of the powerhouses, and to perform excavation in the forebay to replace deteriorating infrastructure as well as enable flows to enter the new generating units. PPL Holtwood also proposes to implement additional measures to enhance migratory fish passage, provide for minimum flows, and perform studies and evaluations. PPL Holtwood requests the modification of license articles that are related to the above proposed design changes

(ii) *Extension of Term of License:* PPL Holtwood requests a 16-year extension of the current license term to September 1, 2030.
