#### **Draft Guidance for Industry on Diabetes Mellitus: Developing Drugs and Therapeutic Biologics for Treatment and Prevention; Availability**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled "Diabetes Mellitus: Developing Drugs and Therapeutic Biologics for Treatment and Prevention." The draft guidance provides recommendations for industry for developing drugs and therapeutic biologics for the prevention and treatment of diabetes mellitus. Because diabetes mellitus has reached epidemic proportions in the United States, FDA recognizes the need for new products that can be used as part of a comprehensive treatment strategy in the treatment and prevention of diabetes. In addition to the draft guidance, FDA plans to convene a public advisory committee meeting to specifically discuss new approaches for the development of products for the treatment of diabetes, with particular emphasis on the design and implementation of studies to assess long-term cardiovascular risks and benefits of these new products. FDA plans to announce the meeting date in a future issue of the **Federal Register**.

**DATES:** Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit written or electronic comments on the draft guidance by May 2, 2008.

**ADDRESSES:** Submit written requests for single copies of the draft guidance to the Division of Drug Information (HFD-240), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. #### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

FDA is announcing the availability of a draft guidance for industry entitled "Diabetes Mellitus: Developing Drugs and Therapeutic Biologics for Treatment and Prevention." Although a number of drugs are available for the treatment of type 1 and type 2 diabetes, many patients remain inadequately controlled, and thus are exposed to a higher risk of long-term complications. This draft guidance provides recommendations on the following topics related to the treatment of type 1 and type 2 diabetes mellitus:

- Diabetes-specific preclinical studies;
- Different study designs in different phases of drug development for both type 1 and type 2 diabetes;
- Study endpoints in the assessment of pharmacokinetic/pharmacodynamic profiles and for efficacy and safety assessment in treating patients with diabetes;
- Study population considerations in different phases of development;
- Sample sizes;
- Study duration; and
- Specific statistical issues related to development of drugs and biologics intended for the treatment of diabetes.

The draft guidance also provides recommendations regarding the

development of products for the prevention of both type 1 and type 2 diabetes.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the agency's current thinking on the treatment and prevention of diabetes mellitus. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
