

Respondents: Individuals or households; and business or other for-profit.

Number of Respondents: 44,127 respondents; 44,127 responses.

Estimated Time Per Response: .084—40 hours.

Frequency of Response: On occasion, quarterly, and semi-annual reporting requirements and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151(i), 154(j), 303, 309 and 310 of the Communications Act of 1934, as amended.

Total Annual Burden: 62,835 hours.

Total Annual Cost: \$6,643,050.

Privacy Act Impact Assessment: Yes.

Nature and Extent of Confidentiality: There is no need for confidentiality with respect to all Amateur Radio Service files in this information collection (IC). Pursuant to Section 208(b) of the E-Government Act of 2002, 44 U.S.C. 2501, in conformance with the Privacy Act of 1974, 5 U.S.C. 552(a)(e)(3), the Wireless Telecommunications Bureau (WTB) instructs licensees to use the FCC's Universal Licensing System (ULS), Antenna Structure Registration (ASR), Commission Registration Systems (CORES), and related systems and subsystems to submit information. CORES is used to receive an FCC Registration Number (FRN) and password, after which one must register all current call signs and ASR numbers associated with an FRN within the Commission's system of records (ULS database). Although ULS stores all information pertaining to the individual license via the FRN, confidential information is accessible only by persons or entities that hold the password for each account, and the Bureau's Licensing Division staff. Upon the request of an FRN, the individual licensee is consenting to make publicly available, via the ULS database, all information that is not confidential in nature.

Needs and Uses: The Commission will submit this information collection (IC) to the OMB as an extension (no change in the reporting and/or third party disclosure requirements) during this comment period to obtain the full three-year clearance from them. There has been a change in the annual cost because the OMB did not record this cost in their inventory back in 2004 when this IC was last submitted for approval. Therefore, we are adjusting the cost from zero (0) to \$6,643,050.

The information collected pursuant to the rules in Part 22 of the Commission's

rules is primarily used by Commission staff to determine, on a case-by-case basis whether or not to grant licenses authorizing construction and operation of wireless telecommunications facilities to telecommunications common carriers, who supply this information when applying for such licenses. Additionally, the information is sometimes used by Commission staff to develop statistics about the demand for various wireless telecommunications licenses and about the performance of the licensing process itself, and on occasion for rule enforcement purposes. Because all application information is routinely and normally made public, interested persons, particularly licensees and their representatives, often review this information as it becomes available in order to determine whether they believe that the wireless telecommunications facilities proposed by applicants would affect any existing or planned wireless telecommunications facilities in which they have an interest. If any adverse effect is anticipated, such parties often use the information to help them prepare pleadings opposing a Commission grant of particular application(s).

Needs and Uses: The information collection requirements included under this OMB Control Number 3060-0833 govern the filing of complaints with the Commission as part of the implementation of section 255 of the Telecommunications Act of 1996, which seeks to ensure that telecommunications equipment and services are available to all Americans, including those individuals with disabilities. As with any complaint procedure, a certain number of regulatory and information burdens are necessary to ensure compliance with FCC rules. The information collection requirements also give full effect to the accessibility policies embodied in section 255, by requiring telecommunications equipment manufacturers and service providers to make end-user product documentation available in alternate formats, including providing contact information to request such documentation, and by requiring them to demonstrate how they considered accessibility during product development, when no other affirmative defenses to a complaint are pertinent.
