SUPPLEMENTARY INFORMATION: On January 25, 2008 (73 *FR* 4556), EPA solicited comment on the Agency's proposed Information Collection Request (ICR) for the coalbed methane (CBM) sector. EPA identified the CBM sector as a candidate for a detailed study in the final 2006 Effluent Guidelines Program Plan (71 *FR* 76656; December 21, 2006) and also identified that it would develop an industry questionnaire to support this detailed study and would seek Office of Management and Budget (OMB) approval under the Paperwork Reduction Act (PRA). EPA is conducting this review to determine if it would be appropriate to conduct a rulemaking to revise the effluent guidelines for the Oil and Gas Extraction Point Source

Category (40 CFR part 435) to control pollutants discharged in CBM-produced water. EPA also noticed it will conduct an ICR in the preliminary 2008 Plan (72 *FR* 61343; October 30, 2007). For each industrial sector, EPA's planning process considers four factors: pollutants discharged, current and potential pollution prevention and control technology options, growth and economic affordability, and implementation and efficiency considerations of revising existing effluent guidelines or publishing new effluent guidelines. EPA will use this ICR to collect technical and economic information from a wide range of CBM operations to address these factors in greater detail (e.g., geographical and geologic differences in the characteristics of CBM-produced waters, environmental data, current regulatory controls, availability and affordability of treatment technology options). See final 2006 Plan (71 *FR* 76666). Response to the questionnaire is mandatory for recipients and EPA will administer the questionnaire using its authority under Section 308 of the CWA, 33 U.S.C. 1318.

The original comment deadline was March 25, 2008. Several stakeholders have requested an extension to the comment period in order to adequately understand this new information collection and provide comments (see EPA-HQ-OW-2006-0771-1074, 1075, www.regulations.gov). This action extends the comment period for 30 days.

Title: Reporting and Recordkeeping Requirements for Importation of Nonroad Engines and Recreational Vehicles (Renewal).

ICR Numbers: EPA ICR No. 1723.05, OMB Control No. 2060-0320.

ICR Status: This ICR is scheduled to expire on May 31, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Individuals and businesses importing on and off-road motor vehicles, motor vehicle engines, or nonroad engines, including nonroad engines incorporated into nonroad equipment or nonroad vehicles, report and keep records of vehicle and engine importations, request prior approval for vehicle and engine importations, or request final admission for vehicles and engines conditionally imported into the U.S. The collection of this information is mandatory in order to ensure compliance of nonroad vehicles and engines with Federal emissions requirements. Joint EPA and Customs regulations at 40 CFR 89.601 *et seq.*, 90.601 *et seq.*, 91.703 *et seq.*, 92.803 *et seq.*, 94.803 *et seq.*, 1068.301 *et seq.*, and 19 CFR 12.73 and 12.74 promulgated under the authority of Clean Air Act Sections 203 and 208 give authority for the collection of information. This authority was

extended to nonroad engines and vehicles under section 213. The information is used by program personnel to help ensure that all Federal emission requirements concerning imported motor vehicles and nonroad engines are met.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Individual importers and companies who import, or import and manufacture, nonroad engines and recreational vehicles.

Estimated Number of Respondents: 4,801.

Frequency of Response: Upon importation.

Estimated Total Annual Hour Burden: 6,029.

Estimated Total Annual Cost: \$372,541, which includes \$36,002 annualized capital and O&M costs.

Changes in the Estimates: There is a decrease of 80,107 hours in the total estimated burden. This decrease is due to a more accurate estimate of the number of import declaration forms (Form 3520-1) received. The burden for nonroad CI use (Form 3520-8) has been reduced to a placeholder, as this program is not currently in use.

Dated: March 13, 2008.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
